2017 Outdoor Leisure Catalogue: Welcome

Established for over 30 years, Quest Leisure is a leading supplier of quality products to the caravan, camping, outdoor leisure, home and garden sectors. Our own brands are exclusively designed to meet customer needs in which we pride ourselves on the quality and features we build into them.

Our extensive range of products is available for all traditional and contemporary buyers within the camping and caravanning sector along with the home and garden sector too.

Within our warehouse we hold substantial stock ready for immediate delivery. Orders are normally despatched within 48 hours.

Your orders can be placed with our sales team, sales office by telephone, email or fax and online.

Contact us today and set up your own personal password to order 'online'.

Buy with Confidence

To be certain of obtaining higher quality products made to the highest possible standards, where manufacturing and testing processes are truly thorough, buy with confidence from Quest.

Not only do we have our own agents worldwide, you can be assured that we visit every one of our suppliers each year to give you a guarantee of continuous quality and confidence that products, processes and delivery match our excellent standards.

Always looking to improve our services, we have invested in our own infrastructure and, have dedicated staff covering all areas of our business on hand to help or offer guidance; simply give us a call.

At Quest we offer extra services and support to all of our customers as standard. These extra services and support are available to any of our customers, at any time and without any extra costs.

Dedicated Staff

We have a dedicated returns, parts and service team who look after all our returns and help with requests for parts and information on our products. We have multiple lines coming in on our standard number (01527 516518) which comes straight through to our office team who not only process your orders, but also provide first line help and support to all of our customers.

We have a dedicated Canvas Queries team who look after all the queries, issues, warranties and registrations of our canvas models and are available to all of our customers.

Automated Services

We also offer automated stock services to any of our customers. This could be a simple automated email that lets you know current stock levels every day, or a full blown export of our products which contains, barcodes, stock status, extended descriptions and anything else.

We have also introduced a website extract which is specific to yourself and contains all the required information to help you maintain and update your own website easily and efficiently.

WEEE and Packaging Compliance

We have just introduced automated WEEE and Packaging Waste exports for customers as well. We know how difficult and time consuming collecting all the information required for the Government WEEE and Packaging regulations is, so we have done all the work for you and can simply email you the totals whenever you wish.

We are always expanding the services we offer to our customers and if there are any specific requests you have, simply to ask and we will investigate them for you.

Electrical and Gas: Kipor generators

KIPOR generators are the perfect choice for you and your customers.

Everything is done for you. You can keep just enough stock to ensure no lost sales and all extra stock is sent direct to your customer without you having to do anything. Even support is handled for you as the support is done direct with Kipor, so you don't have to worry about a thing.

For the end consumer they are an excellent choice as they represent the very best balance between price, performance and features. They have virtually the same performance and features of the very best generators, but with a much, much lower price tag.

Ideal for RV, Camping, Home applications and many more. All the generators have the following features:

- Clean, high quality power • Lightweight • Compact and Portable • Environmentally friendly
- Okay for even the most sensitive electronic equipment • Low Noise Design • Highly Fuel Efficient
- Automatic Overload Shutdown • Low Oil Level Protection • Automatically adjusting engine speed
- Superior Engine Performance

Electrical and Gas: Platinum batteries

We at Quest Leisure have always teamed up with Platinum International and the implementation of the NCC verified battery scheme shows you why. Platinum have one of the largest selection of NCC verified battery ranges available from any manufacturer.

This means that you can get any battery, for any purpose from one single supplier, making it easier than ever before.

It's What's Inside That Counts

Verified Leisure Battery Scheme

What Is The Scheme?

This scheme provides product verification for batteries used in leisure vehicles. With modern leisure vehicles featuring more technology and electrical appliances than ever before, buying an NCC verified leisure battery will give you confidence that the battery purchased is fit for purpose and will perform as advertised.

Battery Classification

The NCC have verified the performance of the label specification on batteries to ensure that you can buy with peace of mind. The batteries will be verified and labelled accordingly into three categories, A, B and C, depending on their category and purpose. By using your knowledge of how you use your caravan or motorhome, you can then choose the best battery for your vehicle.

Intended Purpose:

Frequently used without electrical hook-up

LEISURE BATTERY CLASS A

- ▶ 350+ Life Cycles at 50% Depth of Discharge
- ▶ Minimum Capacity 90Ah

Trojan Range

Platinum Leisure AGM Plus Range

Odyssey Range

- Class A is for batteries with a higher storage capacity for people who frequently use their caravans or motorhomes away from electrical hook-ups and require high power to operate devices such as microwaves and motor movers. Class A verified batteries typically have 10x more cycles than a Class C Battery.

Intended Purpose:

For use with electrical hook-up with minimal off-grid habitation usage e.g. Lights, TV

LEISURE BATTERY CLASS B

- ▶ 200 - 350 Life Cycles at 50% Depth of Discharge
- ▶ Minimum Capacity 90Ah

Bosch Leisure Range

- Class B batteries are aimed at those who frequently use sites with hook-up facilities, but require a greater battery capacity to operate TVs and other devices. Class B verified batteries typically have 3x more cycles than a Class C Battery.

Intended Purpose:

For use with electrical hook-up with minimal off-grid usage e.g. Lights

LEISURE BATTERY CLASS C

- ▶ 70-200 Life Cycles at 50% Depth of Discharge
- ▶ Minimum Capacity 60Ah

Platinum Leisure Range

- Class C is for users that require a lower capacity battery to cover basic operation of their habitation equipment for short periods away from a hook-up.

PLATINUM LEISURE AGM PLUS

360 CYCLES

Specifically
Designed for

Motor Movers

FEATURES & BENEFITS

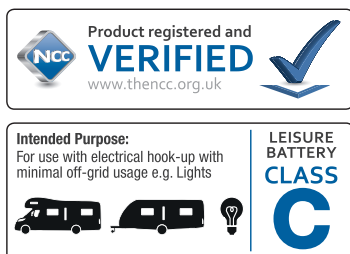

- **Designed For Motor Movers** - Designed to cope with the arduous demands placed on the battery by the Motor Mover
- **Advanced Plate Design** - High pure lead oxide gives high resistance to corrosion and reduces self-discharge therefore offers greater storage time
- **Absorbed Glass Mat Separators** - Increases cyclic capability allowing the battery to be discharged and recharged over 360 times, resulting in longer service life
- **Sealed Construction** - Unique construction ensures no electrolyte leakage from terminals or case. This allows fitments in any orientation
- **Gas Recombination** - Recombines any gasses created during normal usage, totally maintenance free
- **Sealed Low-Box** - Ideal where the fitment location of the battery is restricted

Platinum AGM Batteries

TROJAN DEEP CYCLE

600 - 1000 CYCLES

FEATURES & BENEFITS

- **Trojan Grid Technology** - Trojan's grid technology is a lead antimony alloy grid mixture which provides enhanced power
- **Maxguard T2 Separator** - Provides greater strength resulting in a longer battery life
- **Up To 10 Times Longer Life** - Than a standard Leisure battery
- **Alpha Plus Paste™ With T2 Technology™** - Maximum Operating Performance
- **Faster Recharging** - Capabilities from the AGM & Gel range

- **Robust Plates** - Extends the service life
- **Specialist Fitment** - Suitable for large Motorhomes and RVs
- **Comprehensive Range** - Available from 76 – 230 amps, with multiple terminal options
- **Up To 5 Times More Cycles** - Than a standard Leisure battery
- **Gel Batteries** - Designed to cope with a Deeper Depth of Discharge where charging is infrequent
- **AGM Batteries** - Completely sealed, faster recharge than lead acid

BOSCH LEISURE

200 CYCLES

FEATURES & BENEFITS

- **Ion-Permeable Pocket Separator** - Prevents contact between positive and negative plate – for longer service life and higher starting power.
- **Patented Powerframe (Grid) For Optimum Current Flow And Reduced Corrosion** - The flow-optimized grid design of the Powerframe guarantees consistently high starting power and a long service life. In addition, a special alloy ensures high corrosion resistance and a significantly lower self-discharge

- **Leak-Proof And Tilt-Proof Up To 45°**
- **Backfire Protection** - High safety thanks to its backfire protection and the labyrinth lid returning condensed water to the battery
- **Absolutely Maintenance-Free** - Fit & Forget
- **Set Of Plates With Particularly Robust Connection** - The central arrangement of the connectors between positive and negative plates ensures additional stability

ODYSSEY EXTREME

650 - 1850 CYCLES

FEATURES & BENEFITS

- **Tin Alloy Coated Brass Terminals** - To ensure secure, corrosion-free cable connections, our brass terminals are coated with a high-quality tin alloy
- **Packed with More Power** - Increased cyclic capabilities from a low box size battery. Perfect for Motor Movers!
- **Robust Intercell Connections** - To resist vibration and eliminate internal sparking, cell connectors are casted to the plates and bonded

- **Compressed AGM Plate Separators** - For extreme vibration resistance, the AGM plate separators are compressed before being inserted into the case
- **Pure Lead Plates** - To provide more power, the plates are constructed from 99.99% pure lead. The plates are extremely thin, so more of them can fit into the battery. More lead plates means more power

Awnings, Tents and Canvas: New technology

The Advanced Air System 2 (AAS) is a next generation air tube system. It has been created to give you the benefits of both a multi-inflation system as well as the ease of use of a single inflation system.

The system uses 4 layers for strength and stability. It has the internal bladder which is the part that you inflate. You then have a dual layer protective cover that has a PE and polyester covers bonded together, that adds protection and increases stability. The PE layer of the protective cover is also reinforced at the stress points giving it extra strength and stability. You then have a sleeve which is sewn into the awning which adds a final layer of protection and stability. This not only improves the protection around your air tube, as well as the stability of the awning as the tube is held in position better.

The advanced air system goes one step further than its rivals by giving you the option of multi-inflation or single inflation as well as making it easier and quicker than ever before. No longer do you have to choose between single or multi-inflation, you can have both and use whichever is better for you.

This single inflation system can be inflated by any of its independent valves giving you the maximum of flexibility and in the event of a failure you can simply just remove the affected tube and the system reverts automatically to an independent tube system.

The Air Erect System 2 (AES) is a latest generation, easy to use, simplified air erect system. It is simplified to make it easier to use and less to go wrong.

The system uses 4 layers for strength and stability. It has the internal bladder which is the part that you inflate. You then have a dual layer protective cover that has a PE and polyester covers bonded together, that adds protection and increases stability. The PE layer of the protective cover is also reinforced at the stress points giving it extra strength and stability. You then have a sleeve which is sewn into the awning which adds a final layer of protection and stability. This not only improves the protection you get from the PC cover, but also the stability of the awning as the tube is held in place and position better.

The Air Erect System has individual air tubes rather than a joined system which makes each tube extremely easy to pump up and in the event of a failure only one tube is affected.

It also uses an easy to use single way valve for inflation which is simplicity itself, simply push the pump in and pump.

Awnings, Tents and Canvas: New fabrics

A next generation luxury material.

This is a brand new 300D material which is unlike any other. First of all it is stronger than all of its counterparts. It has a higher tensile strength than standard 300D ripstop material. It is the strongest 300D material available today. It is woven in a completely new way making the final material stronger than previously possible.

Next it is thread dyed rather than woven and then dyed. This means each individual thread has been dyed before it is woven together, usually the material is first woven together and then dyed as it is easier and cheaper, but this material is dyed and then woven. It allows more dye to penetrate the material and each thread gets completely coated allowing for a better and longer lasting colour.

A latest generation luxury material.

This is an excellent, luxurious 300D oxford polyester based material with a unique durable and U.V. stable coating.

The coating not only adds strength and stability to the fabric, but also adds a softer touch giving you a luxury material, with the performance to match and keeps the weight down making it easier to use and manage.

The fabric is made even stronger due to the internal rip stop structure helping to give the fabric extra strength and durability. It lasts longer than lightweight materials and gives your awning a luxurious look and feel.

A latest generation strong and durable material.

It is a brand new 200D oxford polyester based material with a unique durable and U.V. stable coating that adds strength and stability to the fabric.

The fabric is made stronger by the addition of the ripstop giving you a perfect balance between strength, durability and weight. It lasts longer than lightweight materials, is still lightweight and easy to use whilst giving you the durability and strength of a heavyweight material.

A latest generation lightweight material.

The fabric itself is a U.V. coated and treated 190T polyester (also known as a 75D material).

It has an advanced, durable U.V. coating which gives it extra protection against the harmful sun's U.V. rays and extends the life of your awning. The material is extremely lightweight making it easy to handle. It is fast drying as it does not soak up the rain and is easy to clean.

Anti-Weather System

The anti-weather system is not one item but a host of improvements and updates that gives the awning better weather protection.

There are additional weather panels sewn into the canvas at points where the weather could get in. This panel is P.U. coated on both sides and taped on both sides giving you better weather protection.

There is additional guttering on external windows with zips, which add extra protection against the rain. All tie back points or pockets that are sewn in are made from 100% waterproof PVC rather than standard webbing material. Standard material can soak water up and eventually lead to leaks, the waterproof PVC simply does not.

Awning
breathable
matting

Flooring

- Flooring is the perfect companion to your awning, tent or Screen House. We have bespoke flooring, carpet and footprint solutions for the majority of our products, all of which are listed below.
- We have breathable flooring (shown above) for our awnings which is breathable so it can be used on any camp site, no matter the regulations.
- We have comfort carpet for tents and drive away awnings, as they have sewn in groundsheets you do not want breathable matting, so the carpet gives you extra comfort and a nicer feeling underfoot.
- Finally we also have footprints for our tents and drive away awnings. These are great as they give extra protection to the sewn in groundsheet for your model and make it easier to clean and dry when used in wet conditions.
