2018 Outdoor Leisure Catalogue: Welcome

Welcome to the great outdoors

Established for over 30 years, Quest Leisure is a leading supplier of quality products to the caravan, camping, outdoor leisure, home and garden sectors. We love the great outdoors and design our products to help you make the most out of the great outdoors. We use and test our products ourselves and as such will find design tweaks and added features on our products that we have added using our own experiences.

Buy with Confidence

To be certain of obtaining higher quality products made to the highest possible standards, where manufacturing and testing processes are truly thorough, buy with confidence from Quest.

Not only do we have our own agents worldwide, you can be assured that we visit every one of our suppliers each year to give you a guarantee of continuous quality and confidence that products, processes and delivery match our excellent standards.

Always looking to improve our services, we have invested in our own infrastructure and, have dedicated staff covering all areas of our business on hand to help or offer guidance; simply give us a call.

At Quest we offer extra services and support to all of our customers as standard. These extra services and support are available to any of our customers, at any time and without any extra costs.

Dedicated Staff

We have a dedicated returns, parts and service team who look after all our returns and help with requests for parts and information on our products. We have multiple lines coming in on our standard number (01527 516518) which comes straight through to our office team who not only process your orders, but also provide first line help and support to all of our customers.

We have a dedicated Canvas Queries team who look after all the queries, issues, warranties and registrations of our canvas models and are available to all of our customers.

Automated Services

We also offer automated stock services to any of our customers. This could be a simple automated email that lets you know current stock levels every day, or a full blown export of our products which contains, barcodes, stock status, extended descriptions and anything else.

We have also introduced a website extract which is specific to yourself and contains all the required information to help you maintain and update your own website easily and efficiently.

WEEE & Packaging Compliance

We have just introduced automated WEEE and Packaging Waste exports for customers as well.

We know how difficult and time consuming collecting all the information required for the Government WEEE and Packaging regulations is, so we have done all the work for you and can simply email you the details whenever you wish.

We are always expanding the services we offer to our customers and if there are any specific requests you have, simply ask and we will investigate for you.

Electrical and Gas: Platinum batteries

We at Quest Leisure have always teamed up with Platinum International and the implementation of the NCC verified battery scheme shows you why. Platinum have one of the largest selection of NCC verified battery ranges available from any manufacturer.

This means that you can get any battery, for any purpose from one single supplier, making it easier than ever before.

It's What's Inside That Counts

Verified Leisure Battery Scheme

What Is The Scheme?

This scheme provides product verification for batteries used in leisure vehicles. With modern leisure vehicles featuring more technology and electrical appliances than ever before, buying an NCC verified leisure battery will give you confidence that the battery purchased is fit for purpose and will perform as advertised.

Battery Classification

The NCC have verified the performance of the label specification on batteries to ensure that you can buy with peace of mind. The batteries will be verified and labelled accordingly into three categories, A, B and C, depending on their category and purpose. By using your knowledge of how you use your caravan or motorhome, you can then choose the best battery for your vehicle.

Intended Purpose:
Frequently used without electrical hook-up

**LEISURE BATTERY
CLASS
A**

- ▶ 350+ Life Cycles at 50% Depth of Discharge
- ▶ Minimum Capacity 90Ah

Trojan
Range

Platinum Leisure
AGM Plus Range

Odyssey
Range

- Class A is for batteries with a higher storage capacity for people who frequently use their caravans or motorhomes away from electrical hook-ups and require high power to operate devices such as microwaves and motor movers. Class A verified batteries typically have 10x more cycles than a Class C Battery.

Intended Purpose:
For use with electrical hook-up with minimal off-grid habitation usage e.g. Lights, TV

**LEISURE BATTERY
CLASS
B**

- ▶ 200 - 350 Life Cycles at 50% Depth of Discharge
- ▶ Minimum Capacity 90Ah

Bosch Leisure Range

- Class B batteries are aimed at those who frequently use sites with hook-up facilities, but require a greater battery capacity to operate TVs and other devices. Class B verified batteries typically have 3x more cycles than a Class C Battery.

Intended Purpose:
For use with electrical hook-up with minimal off-grid usage e.g. Lights

**LEISURE BATTERY
CLASS
C**

- ▶ 70-200 Life Cycles at 50% Depth of Discharge
- ▶ Minimum Capacity 60Ah

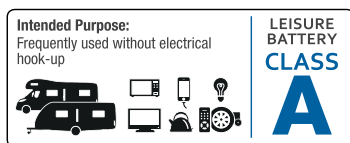

Platinum Leisure Range

- Class C is for users that require a lower capacity battery to cover basic operation of their habitation equipment for short periods away from a hook-up.

PLATINUM LEISURE AGM PLUS

360 CYCLES

Specifically
Designed for

Motor Movers

FEATURES & BENEFITS

- **Designed For Motor Movers** - Designed to cope with the arduous demands placed on the battery by the Motor Mover
- **Advanced Plate Design** - High pure lead oxide gives high resistance to corrosion and reduces self-discharge therefore offers greater storage time
- **Absorbed Glass Mat Separators** - Increases cyclic capability allowing the battery to be discharged and recharged over 360 times, resulting in longer service life
- **Sealed Construction** - Unique construction ensures no electrolyte leakage from terminals or case. This allows fitments in any orientation
- **Gas Recombination** - Recombines any gasses created during normal usage, totally maintenance free
- **Sealed Low-Box** - Ideal where the fitment location of the battery is restricted

Platinum AGM Batteries

• EP001 : Platinum AGMLB6110L • Lifetime cycles (50%): 360 • 100 Amps • Size (lwh): 354 × 175 × 190 mm • NCC Class: A

PLATINUM LEISURE

70 CYCLES

FEATURES & BENEFITS

- **PLATINUM Brand Name** - Is synonymous with premium quality and the very best performance, giving the consumer complete confidence in the product
- **State Of Charge Indicator** Easy to use visual indicator to check the battery's charge and acid levels
- **Engineered For Durability, Cycling And Extended Life**
- **Maintenance Free** - Fit & Forget
- **Sealed Low-Box & Dual Post Batteries** - Ideal where the fitment location of the battery is restricted or where multiple battery connections are required.
- **Labyrinth Lid Technology And Spark Arrestor** Allows emissions to be safely exhausted externally from the caravan or motorhome with added protection against gas combustion within the battery

Platinum Leisure Plus Batteries

• EP008 : Platinum Leisure S6110L • Lifetime cycles (50%): 70 • 110 Amps • Size (lwh): 328 × 171 × 237 mm • NCC Class: C
 • EP010 : Platinum Leisure LB6110L • Lifetime cycles (50%): 70 • 100 Amps • Size (lwh): 351 × 174 × 188 mm • NCC Class: C

TROJAN DEEP CYCLE

600 - 1000 CYCLES

FEATURES & BENEFITS

- **Trojan Grid Technology** - Trojan's grid technology is a lead antimony alloy grid mixture which provides enhanced power
- **Maxguard T2 Separator** - Provides greater strength resulting in a longer battery life
- **Up To 10 Times Longer Life** - Than a standard Leisure battery
- **Alpha Plus Paste™ With T2 Technology™** - Maximum Operating Performance
- **Faster Recharging** - Capabilities from the AGM & Gel range

- **Robust Plates** - Extends the service life
- **Specialist Fitment** - Suitable for large Motorhomes and RVs
- **Comprehensive Range** - Available from 76 - 230 amps, with multiple terminal options
- **Up To 5 Times More Cycles** - Than a standard Leisure battery
- **Gel Batteries** - Designed to cope with a Deeper Depth of discharge where charging is infrequent
- **AGM Batteries** - Completely sealed, faster recharge than lead acid

Trojan Deep Cycle Premium Batteries

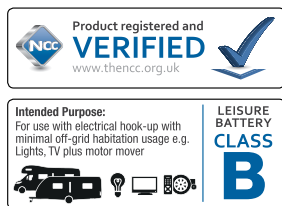

• ET001 : Trojan 31AGM	• Lifetime cycles (50%): 1000	• 100 Amps	• Size (lwh): 341 x 174 x 233 mm	• NCC Class: A

BOSCH LEISURE

200 CYCLES

FEATURES & BENEFITS

- **Ion-Permeable Pocket Separator** - Prevents contact between positive and negative plate - for longer service life and higher starting power.
- **Patented Powerframe (Grid) For Optimum Current Flow And Reduced Corrosion** - The flow-optimized grid design of the Powerframe guarantees consistently high starting power and a long service life. In addition, a special alloy ensures high corrosion resistance and a significantly lower self-discharge

- **Leak-Proof And Tilt-Proof Up To 45°**
- **Backfire Protection** - High safety thanks to its backfire protection and the labyrinth lid returning condensed water to the battery
- **Absolutely Maintenance-Free** - Fit & Forget
- **Set Of Plates With Particularly Robust Connection** - The central arrangement of the connectors between positive and negative plates ensures additional stability

Bosch Specialist Batteries

• EP016 : Bosch L5008	• Lifetime cycles (50%): 200	• 75 Amps	• Size (lwh): 278 x 175 x 190 mm	• NCC Class: C

• EP018 : Bosch L5013	• Lifetime cycles (50%): 200	• 90 Amps	• Size (lwh): 353 x 175 x 190 mm	• NCC Class: B

ODYSSEY EXTREME

650 - 1850 CYCLES

FEATURES & BENEFITS

- **Tin Alloy Coated Brass Terminals** - To ensure secure, corrosion free cable connections, our brass terminals are coated with a high-quality tin alloy
- **Packed with More Power** - Increased cyclic capabilities from a low box size battery. Perfect for Motor Movers!
- **Robust Intercell Connections** - To resist vibration and eliminate internal sparking, cell connectors are casted to the plates and bonded

- **Compressed AGM Plate Separators** - For extreme vibration resistance, the AGM plate separators are compressed before being inserted into the case
- **Pure Lead Plates** - To provide more power, the plates are constructed from 99.99% pure lead. The plates are extremely thin, so more of them can fit into the battery. More lead plates means more power

Electrical and Gas: Kipor generators

KIPOR generators are the perfect choice for you and your customers.

Everything is done for you. You can keep just enough stock to ensure no lost sales and all extra stock is sent direct to your customer without you having to do anything. Even support is handled for you as the support is done direct with Kipor, so you don't have to worry about a thing.

For the end consumer they are an excellent choice as they represent the very best balance between price, performance and features. They have virtually the same performance and features of the very best generators, but with a much, much lower price tag.

Ideal for RV, Camping, Home applications and many more. All the generators have the following features:

- Clean, high quality power • Lightweight • Compact and Portable • Environmentally friendly
- Okay for even the most sensitive electronic equipment • Low Noise Design • Highly Fuel Efficient
- Automatic Overload Shutdown • Low Oil Level Protection • Automatically adjusting engine speed
- Superior Engine Performance

The Avantgarde

best of the best

5 Year
Warranty

The Avantgarde range represents the very top of the range. This is the real designer label range. The fabric is a unique and patented **Duragore 3D mesh**, which means it is a padded fabric that allows the water to run through it, so the chair and leg rest can be left out in any weather. It also means that the chair and leg rest dry within minutes. The frame is a unique **Duralite** material which is lighter and stronger than aluminium, making this the lightest high backed, padded chair available, whilst still giving it a great 150kg maximum load.

Awnings, Tents and Shelters: Westfield by Quest

Westfield by Quest Awnings: a perfect partnership

Westfield by Quest is a partnership between two outdoor leisure companies. Westfield is a high end German brand sold all over Europe who are backed by the largest and most professional outdoor manufacturer in China.

Quest are a UK company who have been supplying the outdoor leisure trade with their own, exclusive products for over 30 years. The two companies have combined to bring you the best in high end manufacturing and processing from Westfield, combined with the expertise, exclusive designs and unrivalled support of Quest in one perfect partnership : Westfield by Quest.

Enhanced support: Not only do you get all of these benefits, but due to our unique partnership you get enhanced European support. This means if you have an issue even if you are away on holiday in Europe, we will endeavour to sort you out in the country you are in. We do not wait for you to come back, we help resolve the issue there and then on holiday, allowing you to continue enjoying yourself.

PERFORMANCE RANGE

Luxury and top of the range.

The Performance range of Westfield by Quest awnings are the top of the range luxury air awnings. These are made from the very best materials, combining the very best technology and air systems to create a unique range of awnings.

They include the high end Advanced Air System which is unique in its ability to switch between single and multi-inflation and allows on site maintenance if required, allowing you to carry on and enjoy your holiday no matter what.

They represent the very best in air awnings.

TRAVEL SMART PRO RANGE

Lightweight, ease of use with added durability.

The Travel Smart Pro range of Westfield by Quest awnings are a mid range of awnings which combine lightweight with durability.

They use midweight fabrics which give a great balance between lightweight, ease of use and durability. They include the high end Advanced Air System 2 which allows you to extend your awning from multi-inflation to a full single inflation kit at anytime if you so wish.

They represent the perfect balance between lightweight, durability and value.

TRAVEL SMART RANGE

Extreme lightweight and ease of use.

The Travel Smart range of Westfield by Quest awnings are a lightweight range of awnings designed around ease of use. They use lightweight fabrics which make them the lightest and easiest awnings available.

The extreme lightweight nature of these awnings make them so easy to slide into the awning rail, that they can be done by one person.

They use the simple and effective Air Erect System 2, which combines simplistic technology that simply does not go wrong with ease of use making them even easier to use.

Awnings, Tents and Shelters: Quest Air Tents

HydraDore **XT PRO**

This is a new generation 300D material which is unlike any other. It is woven in a completely new way giving it a higher tensile strength than standard 300D ripstop materials.

The coating helps add extra durability, makes it easier to clean and has an extremely high level of waterproofing.

It is also thread dyed rather than dip dyed. This means each individual thread has been dyed before it is woven together, allowing more dye to penetrate each thread creating a better and longer lasting colour.

HydraDore **SP**

It is a strong, yet light 200D material with a durable coating that adds strength and stability to the fabric.

The fabric is made stronger by the addition of the ripstop giving you a perfect balance between strength, durability and weight.

It lasts longer than lightweight materials, is still lightweight and easy to use whilst giving you the durability and strength of a heavyweight material.

HydraDore **SL PRO**

An advanced middleweight 150D material with a high performance coating. It keeps the weight down making the awning or tent easier to use, pack away and erect, but the added durability means it will last longer.

The high performance coating adds durability and gives you a very high level of water proofing and protection against the weather.

HydraDore **SL**

An advanced lightweight 75D with a high performance U.V. coating. The coating gives the material extra protection against the harmful suns U.V. rays and extends the life of your awning and gives you a high level of water protection.

The material is extremely lightweight making it easy to handle, fold and packs away to a small size. It is fast drying as it does not soak up the rain and is easy to clean.

The Advanced Air System (AAS) is a next generation air tube system. It has been created to give you the benefits of both a multi-inflation system as well as the ease of use of a single inflation system.

The system uses 4 layers for strength and stability. It has the internal bladder which is the part that you inflate. You then have a dual layer protective cover that has PE and polyester covers bonded together, the PE layer of the cover is also reinforced at the stress points giving it extra strength and stability. You then have a sleeve which is sewn into the awning. This not only improves the protection around your air tube, as well as the stability of the awning as the tube is held in position better.

The advanced air system goes one step further than its rivals by giving you the option of multi-inflation or single inflation. No longer do you have to choose between single or multi-inflation, you can have both and use whichever is better for you.

This single inflation system can be inflated by any of its independent valves giving you the maximum of flexibility and in the event of a failure you can simply just remove the affected tube and the system reverts automatically to an independent tube system.

The Air Erect System (AES) is a latest generation, easy to use, simplified air erect system. It is simplified to make it easier to use and less to go wrong.

The system uses 4 layers for strength and stability. It has the internal bladder which is the part that you inflate. You then have a dual layer protective cover that has a PE and polyester covers bonded together, that adds protection and increases stability. The PE layer of the protective cover is also reinforced at the stress points giving it extra strength and stability. You then have a sleeve which is sewn into the awning which adds a final layer of protection and stability. This not only improves the protection you get from the PC cover, but also the stability of the awning as the tube is held in place and position better.

The Air Erect System has individual air tubes rather than a joined system which makes each tube extremely easy to pump up and in the event of a failure only one tube is affected.

It also uses an easy to use single way valve for inflation which is simplicity itself, simply push the pump in and pump.

The anti-weather system is not one item but a host of improvements and updates that gives the awning better weather protection.

There are additional weather panels sewn into the canvas at points where the weather could get in. This panel is P.U. coated on both sides and taped on both sides giving you better weather protection.

There is additional guttering on external windows with zips, which add extra protection against the rain.

All tie back points or pockets that are sewn in are made from 100% waterproof PVC rather than standard webbing material. Standard material can soak water up and eventually lead to leaks, the waterproof PVC simply does not.
