# Welcome

to the great outdoors

# Who we are

## The perfect partnership

Westfield by Quest is a partnership between two leading outdoor leisure companies.

**Westfield Outdoors** is a high end, German brand sold all over Europe who are backed by the largest and most professional outdoor manufacturer in China.

**Quest** is a UK company who has been supplying the outdoor leisure trade with its own, exclusive products for over 30 years.

The two companies have partnered to bring you the best in high end manufacturing and processing from Westfield, along with with the expertise, exclusive designs and unrivalled support of Quest in one perfect partnership: **Westfield by Quest**.

**Enhanced support:** Not only do you get all of these benefits, but due to our unique partnership you get enhanced European support. This means if you have an issue, even if you are away on holiday in Europe, we will endeavour to look after you in the country you are in. We do not wait for you to come back home, we help resolve the issue while you are on holiday, allowing you to continue having a wonderful vacation.

### PERFORMANCE RANGE

Luxury and top of the range.

The Performance Range of Westfield by Quest awnings are the top of the range, luxury air awnings. These are made from top of the range materials, combining the very best technology and air systems to create a unique range of awnings.

These awnings include the high end Advanced Air System, which is unique in its ability to switch between single and multi-inflation and allows on site maintenance if required.

They represent the very best in air awnings.

### TRAVEL SMART PRO RANGE

Lightweight, ease of use with added durability.

The Travel Smart Pro Range of Westfield by Quest awnings are a mid range of awnings which combine lightweight with durability.

They use midweight fabrics which give a great balance between lightweight, ease of use and durability. They include the high end Advanced Air System 2 which allows you to extend your awning from multi-inflation to a full single inflation kit at anytime if you so wish.

They represent the perfect balance between lightweight, durability and value.

### TRAVEL SMART RANGE

Extreme lightweight and ease of use.

The Travel Smart Range of Westfield by Quest awnings are a lightweight range of awnings designed around ease of use. They use lightweight fabrics which make them the lightest and easiest awnings available.

The extreme lightweight nature of these awnings make them so easy to slide into the awning rail, that they can be done by one person.

They use the simple and effective Air Erect System 2, which combines simplistic technology and reliability with ease of use making them one of the easiest range of awnings available today.

# Materials

Advanced fabrics for your protection

Fabrics are one of the most important parts of your awning or tent. They give it the ability to withstand the weather, make it heavy or light, easy to clean and contribute towards making the awning or tent easier to maintain and live with.

Westfield and Quest have developed a family of advanced fabrics called HydraDore and HydroTech, which give different features and functions to your awning and tent.

These fabrics represent the very best available and give you the biggest and widest choice for performance, weight and durability.

## HydroTech

An extremely high end, luxurious and performant 300D material which is unlike any other. Based on the excellent HydraDore XT Pro then improved with a high end double coating (inside and out) to give you the very highest waterproof rating as well as extra durability and protection from the sun.

The coating is also nicer to touch and feel. The water proof performance and feel of this material is unsurpassed in the market and is only rivalled by performance clothing.

• Density: **300D**

• Waterproof: **10,000 mm**

## HydraDore XT Pro

A luxurious and performant 300D material. It is woven in a completely new way giving it a higher tensile strength than standard 300D ripstop materials.

The coating helps add extra durability, makes it easier to clean and has an extremely high level of waterproofing.

It is also thread dyed rather than dip dyed. This means each individual thread has been dyed before it is woven together, allowing more dye to penetrate each thread creating a better and longer lasting colour.

• Density: **300D**

• Waterproof: **6,000 mm**

## HydraDore SP

It is a strong, yet light 200D material with a durable coating that adds strength and stability to the fabric. Made even stronger by the addition of the ripstop giving you a perfect balance between strength, durability and weight.

It lasts longer than lightweight materials, is still lightweight and easy to use whilst giving you the durability and strength of a heavyweight material.

• Density: **200D**

• Waterproof: **4,000 mm**

## HydraDore SL Pro

An advanced middleweight 150D material with a high performance coating. It keeps the weight down making the awning or tent easier to use, pack away and erect, but the added durability means it will last longer.

The high performance coating adds durability and gives a very high level of water proofing and protection against the weather.

• Density: **150D**

• Waterproof: **4,000 mm**

## HydraDore SL

An advanced lightweight 75D with a high performance coating. The coating gives the material extra protection against the harmful sun's U.V. rays and extends the life of your awning and gives you a high level of water protection.

The material is extremely lightweight making it easy to handle, fold and packs away to a small size. It is fast drying as it does not soak up the rain and is easy to clean.

• Density: **75D**

• Waterproof: **3,000 mm**

# Included technology

## Air systems and weather protection

The Westfield by Quest awning range combines two different air systems and an anti-weather system to create unique awnings that provide features not readily available anywhere else.

The Advanced Air System (AAS) is a high specification air tube system. It has been created to give you the benefits of both a multi-inflation system as well as the ease of use of a single inflation system. The system uses 4 layers for strength and stability.

**Layer 1:** The internal bladder which is the part that you inflate.

**Layers 2 and 3:** Then we have a dual layer protective cover that has PE and polyester covers bonded together, the PE layer of the cover is also reinforced at the stress points giving it extra strength and stability.

**Layer 4:** Finally we have a sleeve which is sewn into the awning. This not only improves the protection around your air tube, as well as the stability of the awning because the tube is held in position better.

The Advanced Air System goes one step further than its rivals by giving you the option of multi-inflation or single inflation. No longer do you have to choose between single or multi-inflation, you can have both and use whichever is better for you.

The single inflation system can be inflated by any of its independent valves giving you the maximum of flexibility. In the event of a failure, you can simply just remove the affected tube and the system reverts automatically to an independent tube system.

The Air Erect System (AES) is an, easy to use, air erect system. Simplified to make it easier to use and less to go wrong, the system uses 4 layers for strength and stability.

**Layer 1:** The internal bladder which is the part that you inflate.

**Layers 2 and 3:** Then we have a dual layer protective cover that has PE and polyester covers bonded together, the PE layer of the cover is also reinforced at the stress points giving it extra strength and stability.

**Layer 4:** Finally we have a sleeve which is sewn into the awning. This not only improves the protection around your air tube, as well as the stability of the awning because the tube is held in position better.

The Air Erect System has individual air tubes rather than a joined system which makes each tube extremely easy to pump up, so if there is a failure only one tube is affected.

It also uses an easy to use single way valve for inflation which is simplicity itself; simply push the pump in and pump.

## Anti-Weather System

The anti-weather system is not one item but a host of improvements and updates that gives the awning better weather protection.

There are additional weather panels sewn into the canvas at points where the weather could get in. This panel is PU coated and taped on both sides giving you better weather protection.

There is additional guttering on external windows with zips, which add extra protection against the rain.

All tie back points or pockets that are sewn in are made from 100% waterproof PVC rather than standard webbing material. Standard material can soak water up and eventually lead to leaks, the waterproof PVC simply does not.

# The Pluto

## Top of the range full air awning

The Pluto is a traditionally styled full air awning. This is a true top of the range, luxury air awning with performance, style, classic looks and durability built in.

It features the simply amazing **Hydrotech** fabric which gives unrivalled performance, amazing looks, great feeling to touch, and the very best protection against the elements.

You get the brilliant **Advanced Air System** which gives you single inflation from the start, ease of use and reliability. You also get the new '**Super-tubes**' which are larger, stronger and more rigid than its rivals. This allows the awning to have less beams making the inside far more roomy and more aesthetically pleasing. The high specification bravo pump also makes it easier to inflate.

There are no hidden extras here, you even get a veranda pole giving you more options. It can also be extended with 1 or 2 annexes allowing you to increase the living or storage space if required.

The removable front and side panels make this easier to pick up and slide through your awning channel, helping to make this awning easier to erect.

This awning has more panoramic views than all of its rivals. It features maximum sized windows to give you the very best views. They go lower to the floor letting more light in adding that extra feeling of space and light all the time. The awning also features unique side doors which includes an additional window panel, giving even more views and light in from the side.

### Features

- Available in three sizes and featuring the luxury, any season, **Hydrotech** fabric.
- **Advanced Air System** and **Super-Tubes** with single inflation.
- **Anti-weather system** for added protection.

# The Aries

## Style, features and amazing views

The Aries comes in two sizes; 350 and 260. It has large, scenic windows which gives you amazing views and allowing loads of natural light in. It can also be extended using the optional (sold separately) annex.

It features the excellent **HydraDore XT pro** fabric which means that this awning is amazingly strong, yet lightweight and will last for years. It has the unique **Advanced Air System** which is the only system available that gives you the option of single or multi-inflation. You can have the cost saving benefit of multi-inflation or choose the optional single inflation kit to upgrade it to full single inflation at any time.

**Westfield**® BY **QUEST**  
OUTDOORS leisure products

The removable front and side panels make this easier to pick up and slide through your awning channel, helping to make this awning easier to erect.

The awning comes with storm straps as standard and even has storm strap pockets allowing you to put them away safely and securely when taking the awning down. This stops them getting tangled up with the canvas making the awning easier to pack away.

# The Omega

## Classic and top of the range

The Omega comes in one size, 400 and is a true top of the range awning. It features the amazingly strong **HydraDore XT** pro material which gives you unrivalled strength and helps ensure your awning lasts for years.

You get the brilliant **Advanced Air System** which gives you single inflation from the start. You also get the high specification bravo pump making it easier to inflate than ever before. Additional (optional for use) storm poles are also included. There are no hidden extras here, you even get a veranda pole giving you more options. It can also be extended with 1 or 2 annexes allowing you to increase the living or storage space if required.

The removable front and side panels make this easier to pick up and slide through your awning channel, helping to make this awning easier to erect.

Windows, windows and even more windows, the huge, full size panoramic windows to the front and side mean you get perfect views all around giving you the feeling of being outside even when inside.

You also have the emergency support system to ensure that in the unlikely event that there is an issue, you are supported and your awning will not come crashing down around you.

### Features

- Featuring the any season, performant **HydraDore XT PRO** fabric.
- **Advanced Air System** with single inflation and **Super-Tubes**.
- **Anti-weather system** for added protection.

# Gemini Pro

## Added performance and features

The Gemini Pro comes in one size, 390 and is an improved version of the standard Gemini. It is a modernised classic look awning packed full of features. It uses the new **HydraDore SL Pro** fabric which gives you a great balance between lightweight, easy to use awning with added durability making it last longer.

It is inner tent ready, and can have one or two inner tents inside, allowing you to add bedrooms for those extra guests if needed. There are 5 doors available on the awning, with an eyebrow canopy over the front centre door stopping the rain and water coming in when the door is opened.

**Westfield**® BY **QUEST**  
OUTDOORS leisure products

It also features the unique **Advanced Air System**, which is the only system on the market that allows you to have this awning in multi inflation or single inflation modes, the choice is up to you.

This awning is perfect for those looking for a large family awning that is easy to use, lightweight with added durability from the **HydraDore SL PRO** fabric.

### Gemini 390 Pro

Awning rail height: 235 - 250 cm.  
Width: 390 cm.  
Depth: 250 cm.  
Pack size: 115 x 35 x 35 cm.  
Awning weight: 15.3 kg.  
Total weight: 17.6 kg.

# Dorado Pro

Lightweight with added performance

The Dorado Pro comes in one size, 400 and is an improved version of the standard Dorado. It has a larger space and improved headroom making it feel much larger inside.

It uses the new **HydraDore SL PRO** fabric which gives you a great lightweight, easy to use awning with added durability making it last longer.

It comes complete with a storm roof pole giving you added strength and stability. Due to the use of the **Advanced Air System**, you can opt for the storm air beam which gives you the extra strength and stability, without the need for a storm pole.

The Dorado Pro gives you a great amount of space in a lightweight awning that is extremely easy to use. The added durability of the **HydraDore SL PRO** fabric means it will also outlast its lighter rivals.

This awning is perfect for those looking for a lightweight awning, with good space, with the added durability of a 150D material and single inflation.

## Features

- Featuring the **HydraDore SL PRO** lightweight and durable fabric.
- **Advanced Air System** with single inflation.
- **Anti-weather system** for added protection.
- Full ventilation side doors plus permanent, built in ventilation to minimise condensation.

# The Lynx

## When space is at a premium

The Lynx comes in two sizes, the 200 and 240 and is a lightweight awning with a small footprint. Extremely easy to use, easy enough to erect by one person.

It has large, scenic windows allowing lots of light inside and great views when inside the awning. The use of the efficient **Air Erect System** means that the tubes are independent of each other and can be inflated with as little as 12 repetitions on the pump. It comes with a storm pole to add stability in adverse weather conditions. The small size is perfect when space is at a premium and when you only want a small porch.

**Westfield**® BY **QUEST**  
**OUTDOORS** leisure products

Featuring the lightweight **HydraDore SL** fabric that gives you great performance in a lightweight fabric which makes this awning even easier to erect, use and store away when not in use. The fabric also dries quickly, making it even easier to manage.

The Lynx is the perfect, lightweight awning when space is at a premium or when you simply want a small porch.

# Dorado

The lightest and easiest awning

The Dorado comes in one size and combines the easy to use nature of a lightweight awning along with an easy to use air system means you get one of the simplest and easiest to use awnings available.

The efficient **Air Erect system** combines ease of use and simplistic reliability in one great system. The system is simple, making it extremely easy to use but also reliable as there is little to go wrong; a perfect combination.

The use of one single air beam means that this awning can be erected in as little as 12 repetitions on the included double

action pump. Combine this with the excellent lightweight **HydraDore SL** fabric means that this awning can easily be erected by one person. The fabric is also very quick to dry making the awning easier to manage and use.

Added stability can be gained by the optional storm poles giving you benefit in adverse weather conditions and making this lightweight awning great for use in many different weather conditions.

This really is an extremely easy awning to erect, use and live with; the perfect, lightweight air awning.

## Features

- Featuring the quick drying, lightweight **HydraDore SL** fabric.
- **Air Erect System** with single inflation.
- **Anti-weather system** for added protection.
- Full ventilation side doors plus permanent, built in ventilation to minimise condensation.
- Sewn in rear draught excluding pads included.
- Two independent front panels and four doors (2 front, 2 side).
- Great views with super-clear windows with internal blinds.
- Double beading (4 and 6mm) for easy multi-vehicle attachment.
- Extremely lightweight, very quick and easy to erect.
- **Single person pitch:** The awning is so lightweight it can be pitched by a single person.
- Front panels can be rolled up or used as sun canopies with optional universal canopy pole kit (purchased separately).

## Details

- Warranty: 12 months.
- Fabric: **HydraDore SL**
- Windows: Super-clear foil
- HH: 3,000 mm.

## Optional Extras

- Roof storm pole kit
- Breathable flooring
- Rear leg poles
- Front storm leg pole
- High volume bravo pump
- Universal canopy pole kit
- Quest awning and tent light
- LED lighting
- Windshield Pro

## Dorado 350

Awning rail height: 235 - 250 cm.  
Width: 350 cm.  
Depth: 250 cm.  
Pack size: 103 x 28 x 26 cm.  
Awning weight: 5.6 kg.  
Total weight: 9.7 kg.

## Features

- Available in two sizes and featuring the **HydraDore SP** fabric.
- **Advanced Air System** with single or multi-inflation.
- **Anti-weather system** for added protection.
- Ventilation front panel with full ventilation tunnel door and permanent, built in ventilation to minimise condensation.
- Includes storm roof pole for extra rigidity.
- Two doors (1 front, 1 tunnel).
- Full sewn in groundsheet with peg down entrances to remove the trip hazard, also with additional groundsheet for the tunnel.
- Reflective storm straps with strap tidy pockets
- Oversized front canopy with windows, that can be rolled away.
- Large super-clear, full view scenic windows with internal blinds.
- **Inner tent ready**: Add a sleeping pod, it takes the aquila inner tent.
- Double beading (4 and 6mm) for easy multi-vehicle attachment.
- 3-Way vehicle attachment system gives great flexibility & choice.
- Half or whole fold rear panel for easy access to vehicle door(s).

Awning weight: 17.5 kg  
Total weight: 22.7 kg.

## Aquila low

Connection height: 180 - 245cm.

## Aquila high

Connection height: 245 - 280cm.

# Aquila

Luxury and style for your motorhome

The Aquila comes in two sizes, low and high and is the perfect, luxury motorhome awning which can also be used on a caravan. It features the **Advanced Air System** which gives you the option of switching from multi-inflation to single inflation with the optional single inflation kit. It comes complete with a storm roof pole to give added stability in adverse weather conditions.

Two large, scenic windows give you the perfect outlook and allows an amazing amount of light inside, whilst the eyebrow canopies add style and cover to the permanent built in ventilation. This ventilation helps the air to flow, but keeps the weather out, guarding against condensation at all times.

**Westfield**® BY **QUEST**  
OUTDOORS leisure products

The oversized, front canopy is large enough to have a table and chairs under allowing you to really get outside, yet retain the cover from the elements. This can be rolled away if you don't want to use it.

The use of the **HydraDore SP** fabric means you get the perfect balance between strength and weight making it easy to use and very durable.

# Aquarius Pro

Designed and built for a camper

The Aquarius Pro has been designed and built for use on a camper van, but can be used on various other vehicles. It comes in two sizes (low and mid) allowing it to be used on other vehicles as well. It features the excellent **HydraDore SL PRO** fabric which gives you the best balance between lightweight, for ease of use, and durability for strength and longevity.

The awning features the **Advanced Air System**, which gives you the option of turning your multi-inflation awning into a single inflation awning whenever you wish. It comes with a storm roof pole for added stability in adverse weather.

The fully 'tubbed' groundsheet helps keep the weather out, but with the peg down doorways, does not cause trip hazards like its rivals. The small, front canopy not only adds style but helps keep the rain and water out when the front door is opened. The side eyebrow canopies again add style, but also allows permanent built in ventilation which helps keep condensation down and the air flowing inside.

It is also inner tent ready and can take a two berth inner tent inside to give you additional sleeping space if required.

## Features

- Available in two sizes and featuring the **HydraDore SL PRO** fabric.
- **Advanced Air System** with single or multi -inflation.
- **Anti-weather system** for added protection.
- Full ventilation tunnel door, plus permanent, built in ventilation to minimise condensation.
- Includes storm roof pole for extra rigidity.
- Two doors (1 front, 1 tunnel).
- Full sewn in groundsheet with peg down entrances to remove the trip hazard, also with additional groundsheet for the tunnel.
- Front canopy over awning front to keep the rain off.
- Large panoramic super-clear side windows with internal blinds
- **Inner tent ready** : Add a sleeping pod, the aquarius inner tent
- **LED ready** : LED light sleeve on front internal beam.
- Double beading (4 and 6mm) for easy multi-vehicle attachment.
- 3-Way vehicle attachment system gives great flexibility & choice.
- Half or whole fold rear panel for easy access to vehicle door(s).

## Details

- Warranty: 12 months.
- Fabric: **HydraDore SL PRO**
- Windows: Super-clear foil
- HH: 4,000 mm.

## Optional Extras

- Inner tent
- Single inflation kit
- High volume, bravo pump
- Comfort carpet
- Drive away kit
- LED lighting
- Windshield Pro

## All sizes

Width: 300cm.  
Height: 200cm.  
Depth: 280 - 310 cm.  
Pack size: 115 x 30 x 30 cm.  
Awning only weight: 11.95 kg.  
Total weight: 17.5 kg.

## Aquarius Pro low

Connection height: 180 - 210 cm.

- Total weight: 21.25 kg.

## Hydrus Pro mid

Connection height: 210 - 245 cm.

## Hydrus Pro high

Connection height: 245 - 280 cm.

# Hydrus Pro

Amazing space in a standard pitch

The Hydrus Pro comes in two sizes (mid and high) and is a large, drive away awning that is turned sideways to help it fit onto a standard pitch.

This enables you to have a huge 420cm awning that gives you an amazing amount of space. You can add the optional oversized inner tent to give you an extra bedroom and still have space for furniture.

The awning uses the **Advanced Air System**, which gives you the option of turning your multi-inflation awning into a single inflation awning, by purchasing the optional single inflation kit. It already comes with two storm roof poles for added stability in adverse weather.

**Westfield**® BY **QUEST**  
OUTDOORS leisure products

The Hydrus Pro features the **HydraDore SL PRO** fabric which gives you the best balance between lightweight, for ease of use, and durability for strength and longevity.

The fully 'tubbed', sewn in groundsheet is great at keeping the weather out, but with the added peg down doorways you can also remove those annoying trip hazards when the doors are in use.

# Hydra

## Lightweight and performance

The Hydra comes in three sizes (low, mid and high) and is an excellent medium sized motorhome awning that is amazingly easy to use; it can also be used on a caravan.

It uses the efficient **Air Erect System**. The simple and easy to use system makes it extremely easy to inflate and easy to erect, so much so that it can even be done by one person.

The addition of the door in the tunnel allows you to enter and exit the awning without walking through the main awning; perfect when you have muddy boots and wet coats.

The use of the superb **HydraDore SL** fabric means that this is extremely lightweight, making it even easier to carry, store, use and erect. It is also quick to dry and U.V. coated to help prevent damage from the sun and prolong the life of the awning.

The sewn in, fully tubbed groundsheet is great at keeping the weather out, but with the added peg down doorways, you can also remove those annoying trip hazards when the doors are in use.

### Features

- Available in three sizes and featuring the **HydraDore SL** fabric.
- **Air Erect System** with multi-inflation, independent beams.
- **Anti-weather system** for added protection.
- Full ventilation tunnel door, plus permanent, built in ventilation to minimise condensation and two doors (1 front, 1 tunnel).
- Full sewn in groundsheet with peg down entrances to remove the trip hazard, also with additional groundsheet for the tunnel.
- Super-clear side windows with internal blinds
- **Inner tent ready** : Add a sleeping pod, the hydra inner tent
- Double beading (4 and 6mm) for easy multi-vehicle attachment.
- 3-Way vehicle attachment system gives great flexibility & choice.
- Half or whole fold rear panel for easy access to vehicle door(s).
- Front panel can be rolled up or used as sun canopy with optional universal canopy pole kit (purchased separately).

### Hydra mid

Connection height: 210 - 245 cm.

### Hydra high

Connection height: 240 - 280 cm.

**Quest Tec FullC**  
100% cotton, fully breathable

# Bell Tents

Why camp, when you to glamp

The Quest Elite Signature range are a premium set of classic and modern tents. All are made to the very highest standards with traditional materials and modern production to give the very best in camping. We have the classic Bell Tent in multiple sizes, along with the modern Touareg which gives you extra room and then the top of the range, palatial Emperor which looks as amazing as it performs.

## Quest Tec FullC Fabric

A true premium fabric, it is a full 100% cotton canvas. This is no part cotton and part polyester fabric, it is a true 100% full cotton canvas. Cotton is more U.V. resistant than polyester and polycotton and the fabric is treated against mould, rot and U.V. degradation giving it extra durability, extra strength and extra protection against the elements. The process that treats the fabric is also a premium process and not simply a coating. The process ensures that the treatment impregnates the material fully which ensures the very best protection for the fabric and also ensures the fabric keeps its breathability. So this is a full 100% cotton material, treated against the elements, waterproof and is still a breathable material giving you the very best of everything in one fabric.

The fact that this is 100% cotton also means that it is stronger than its polyester and polycotton rivals and has no need for ripstop as the fabric is already extremely tear resistant. Even in the event of an issue cotton material is repairable, so you can repair it if required. The breathability of this fabric means that the tent feels cooler in the summer and helps avoid condensations as it allows the tent to breath. It is also warmer in the colder months as the material is thicker than its polyester and polycotton rivals and has more natural insulation to help keep the warmth in.

## Fully Zipped in Groundsheet (ZIG)

This tent features a fully zipped in groundsheet, which is a premium feature that allows you to unzip the groundsheet from the main tent. The ZIG gives you the ability to use the 360 Vista view without the need to unpeg anything. It also makes it easier to manage as whilst unzipped the groundsheet can be taken away and cleaned separately from the main tent. The groundsheet itself is a heavy duty, premium 540gsm full PVC material. This material is extremely hard wearing, durable and easy to clean. The groundsheet also gives you extra protection from the ground as it adds that extra layer between you and the earth. The fact that it is a zipped in groundsheet also means that it adds strength and stability to the tent as the groundsheet becomes an integral part of the unit.

## Single Person Pitch

This tent can be pitched by a single person. It is quicker to do it with two, but can be pitched by one. We test pitch every tent ourselves and only tents that we pitch with one person, without any need for extra help get this feature.

**QUEST ELITE®**  
*Signature*

## Pitch Times

The pitch times on these tents is incredibly low, far lower than you would expect. All our pitch times are tested by ourselves and can be viewed online in the full length, non edited videos. Our pitch times are 100% complete pitch times and include the time taken to peg every single pegging point and guy rope.

## 360 Vista View

This allows you to roll up the entire side wall of the tent up and toggle in place. This leaves you with a stunning 360 degree view all around and a magical floating roof. On those really hot days this can be a great benefit, a really different way to appreciate, use and have fun with your tent. All this is done without the need to pitch or re-pitch your tent, you simply unzip the sidewall from the groundsheet, then roll it up and secure in place with the in-built toggles. You can even do the vista view on part of the tent and leave the rest in standard mode the versatility is built in.

## Scenic Windows

Bell tents usually do not have windows, but this bell tent does. Windows are great in tents they allow light in and keep the weather out, allowing you to use them all year round. This tent has them built in from the start. They are premium quality crystal clear windows giving you great and un-obscured views and have internal zipped blinds. This gives you the ability to zip them shut for additional privacy whenever you want.

## No-Chill premium mesh

This tent has built in ventilation using the Quest premium no-chill mesh. This mesh is extremely strong, durable and hard wearing. It is pull and damage resistant and looks great. The structure and build quality of the mesh allows the air in, but keeps the wind chill out. When wind blows against this mesh the air is allowed through, which enables perfect air circulation, but it stops the wind so you don't feel the wind chill. Our mesh panels all have premium zipped internal blinds which allows you to fully close the vents when you want to.

## Inner Tent Ready

This tent is inner tent ready, which means it can have at least one inner tent fitted inside the tent to give you that sleeping pod / sleeping area. The inner tent is simplicity itself, to fit it all you do is clip the inner tent in place using the toggles on the inner tent and the sewn in toggles points in the tent. If you don't want to use the inner tent during the day, you can simply remove it or even just drop it to the floor.

# The Bell

Premium, classic and fun

The Bell comes in two sizes, 4M and 5M and is a premium quality, full cotton, canvas frame tent with an extra thick PVC zip in groundsheet which makes this a fantastic family friendly tent or perfect for a couple who want that bit more space. Sleeping anywhere from 1 – 4 adults in the 4m or 1 – 6 adults in the 5m, this simple steel framed tent can be put up by one person making this one of the easiest tents on the market to erect.

The tried and tested design has been around since the 9<sup>th</sup> century so you can be confident that this tent will be ready for action whether in the summer or the heart of the winter. As the tent is made from 100% cotton canvas in the summer the tent will be breathable keeping it cooler compared to typical polyester

and polycotton tents. Yet in the winter the insulation properties compared to a polyester tent will make this tent warm and cosy so you can camp all year round safe in the knowledge that you have made the right decision.

The heavy duty PVC groundsheet can be unzipped and rolled up to allow the breeze to come through on those hot days to truly make a unique feature no other tent has.

The steel frame construction is robust giving you peace of mind that this tent will be with you for years to come. Complete with everything you need to setup including heavy duty pegs, pre-attached guy lines & rain cowl for the "A frame"

## Pitch Times

# The Touareg

Premium, modern style, extra room

Offering a more open feeling compared to other tents, the Touareg has fantastic features with a unique quality.

The Touareg has doors at either end, as well as double windows, so you can be sure to have plenty of natural light or ventilation throughout your holiday. The 100% cotton material also offers extra breathability so there is little or no condensation with this model meaning you can enjoy your holiday without worrying that your tent is leaking.

Breathable with less condensation than any polycotton or polyester rival

**QUEST ELITE®**  
Signature

The heavy-duty PVC groundsheet can be unzipped and rolled up to allow the breeze to come through on those hot days to truly make a unique feature no other tent has.

The steel frame construction is robust giving you peace of mind that this tent will be with you for years to come. Complete with everything you need to set up including heavy duty pegs, pre-attached guy lines & rain cowls for the "A frame".

With a compact pack size you will still have plenty of space in the car to make sure you pack everything you need for your trip without having to get a trailer or roof box, compared to other tents on the market.

# The Emperor

Premium, palatial and true glamping

A premium quality, cotton canvas frame tent with an extra thick zip in groundsheet makes this a fantastic family friendly tent or perfect for a couple who want that bit more space.

Be the envy of all campers onsite with this amazing "big top tent" and stand out from the crowd whilst also making sure you never lose where you pitched your tent again. The Emperor is the ultimate Glamping tent which enables you to utilise the space anyway you want and make it different every time you go away or even adjust it for when friends come to stay.

100% cotton material means no more worrying about "is my tent leaking?" as this is a fully breathable material. With this in mind,

the cotton material has much better insulation properties which will keep the tent cooler in the summer and warmer in the colder months enabling you to camp all year round.

The heavy-duty PVC groundsheet can be unzipped and rolled up to allow the breeze to come through on those hot days to give you that 360° Vista View.

The steel frame construction is robust giving you peace of mind that this tent will be with you for years to come. Complete with everything you need to set up including heavy duty pegs, pre-attached guy lines & rain cowls for the "A frame".

## Screen House 4

Width: 240 cm.  
Height: 180 - 220 cm.  
Depth: 480 cm.  
Pack size: 173 x 15 x 15 cm.  
Screen House weight: 8.5 kg.  
Total weight: 10.5 kg.

# Screen House 4

One person, one minute

The Screen House 4 is the original, quickest, easiest and best gazebo on the market. It has 4 sides and is built and designed so one person can erect (or take it down) in less than one minute.

There is nothing to build, put together, tension or inflate, you simply take it out of the bag, unfold it and pull/push the sides and roof and it springs into position - fully set up and ready to peg.

It uses the latest generation **premium hub system** which has been improved on again making it smaller, lighter and more durable, whilst maintaining its ease of use and ability to be repaired if required.

**QUEST**  
leisure products

It comes with pegging points on every corner and in the middle of each side giving you great ground anchorage. It has storm straps on every side ensuring it stays up in adverse weather and makes it sturdier than any gazebo you are used to.

The premium **Pmesh panels** are built in, these help keep you warmer in the wind and cooler in the sun, but allows the air to flow ensuring no gas build up can occur inside. The roof is waterproof so it keeps the water off and the U.V. coated **Quest Tec 210** material gives you a U.V. rating of 50+ keeping you safe from the sun's rays.

# Screen House 4 Pro

One person, one minute, extra features

This is the Pro version of the best selling Screen House 4. It is still the simplest, quickest, easiest and best gazebo on the market. It has 4 sides and is built and designed so one person can erect (or take it down) in less than one minute.

It has all the benefits from the premium **Quest No-Chill** mesh panels, with additional sewn in and fully zipped **Quest-Tec 210** sidewalls. This gives you an un-rivalled amount of options. You can roll the sidewalls down for complete privacy. Open the external blinds on the windows to allow light and views in, or roll the entire sidewall up to reveal the premium quest No-Chill mesh sides allowing it to be warmer in the wind and cooler in the sun.

It uses the latest generation **premium hub system** which has been improved on again making it smaller, lighter and more durable, whilst maintaining its ease of use and ability to be repaired if required.

The Screen House 4 Pro also features the new accessory zip. This is a full zip that runs around the entire front of the screen house allowing for additional accessories to be attached to extend the features of your screen house.

Complete **No-Chill** mesh sides & fully zipped **Quest-Tec 210** sidewalls & additional windows !

# Screen House 6 Pro

One person, one minute, extra features

This is the Pro version of the best selling Screen House 6. It is still the simplest, quickest, easiest and best gazebo on the market. It has 6 sides and is built and designed so one person can erect (or take it down) in less than one minute.

It has all the benefits from the premium **Quest No-Chill** mesh panels, with additional sewn in and fully zipped **Quest-Tec 210** sidewalls. This gives you an un-rivalled amount of options. You can roll the sidewalls down for complete privacy. Open the external blinds on the windows to allow light and views in, or roll the entire sidewall up to reveal the premium quest No-Chill mesh sides allowing it to be warmer in the wind and cooler in the sun.

It uses the latest generation **premium hub system** which has been improved on again making it smaller, lighter and more

durable, whilst maintaining its ease of use and ability to be repaired if required.

The Screen House 6 Pro has two entrances. This means you can enter (or exit) the screen house from two different sides. This extra door also means that you can extend the screen house using the new accessory zip detailed later.

As well as this, the Screen House 6 Pro has an included accessory zip. This is a full zip that runs around the entire front of the screen house allowing for additional accessories to be attached. The accessory zip also allows you to zip two screen house 6's together to create a massive Screen House 12, you can go even further adding up to 5 screen houses together to give you a huge area of shelter.

# Windshield Pro

The ultimate windbreak

The Windshield Pro is the very best windbreak available. It is lighter, more extendable, more secure and more stable than its rivals.

It has a patented frame system that has been designed with one job, to deliver the very best windbreak possible. The Windshield Pro can be slid into your caravan (or motorhome) awning channel (if available) allowing you to come directly off the vehicle.

The frame system locks itself in place making it easier to erect and more sturdy when in use. The unique frame system

means no guy lines are required and the entire frame system can be placed on one side of the windshield ensuring you have absolutely no trip hazards and you get to use 100% of the space available.

It can be extended with a door, an additional panel and now a weather shade giving you an amazing amount of options. The windbreak is designed to go right down to the ground and with its additional pegging points held down making a secure and safe place on the inside, perfect for pets and children.

## Features

- Sun and wind protection, with viewing windows.
- Premium, lightweight, all weather aluminium frame.
- Can be set up in various different shapes & extendable to any size.
- Lightest in its class, and extremely sturdy and stable.
- Unique pole system means no guy lines.
- Easier to use than guy line versions.
- Use 100% of your space, with no trip hazards.
- Fabric comes right down to the ground.
- Pegging points at the corner of every panel and additional ones in the centre of each panel.
- Floor plates for added stability.
- Can be connected directly to a caravan.
- Can connect to another Windshield.
- Ground spikes in every vertical pole.
- Additional panels, door panel and weather canopy available.
- Comes in its own premium carry case

## Details

- Warranty: 12 months
- Fabric: **HydraDore SP**
- Super clear windows
- Frame: Frosted coated aluminium

## Optional Extras

- Additional extension panel
- Sun / Barbecue cover
- Door panel

# Utility

## Storage, shower or toilet tent made easy

The Utility tent is available in two sizes, the standard version or the large version. It can be used as a simple storage tent, or an easy to use shower tent, your own private toilet tent, a great fishing shelter or even the perfect small utility tent.

The standard version is 155 x 155 cm whilst the large is an impressive 250 x 250 cm. Both sizes are erected the same way and feature the exact same frame system. These really are the quickest and easiest utility tents available.

**QUEST**  
leisure products

The Utility tent can be erected by one person in a matter of seconds, being so lightweight, easy to carry and store. There is nothing to put together, nothing to assemble, you just take it out of the bag, put it onto the floor and open it up. The frame locks in position so you don't even have to tension it, everything is done for you.

The removable floor allows it to be used as a toilet tent and the addition of the utility shelf allows it to be used as a shower tent.

### Standard Utility (155)

Size: 155 x 155 cm.  
Height: 205 - 220 cm.  
Pack size: 17 x 17 x 105 cm.  
Total weight: 5.5 kg.

### Large Utility (250)

Size: 250 x 250 cm.  
Height: 210 - 225 cm.  
Pack size: 17 x 17 x 116 cm.  
Total weight: 6.5 kg.

 **Very Lightweight**

# Quest Elite® Autograph

Premium furniture that packs away

When you need your furniture to pack away to a smaller size, but still want that Quest quality then the Quest Elite® Autograph range is the perfect solution.

Available in two different colours, either the classic paprika and cream, with black highlights or the modern black and grey with cream highlights.

Built using the same premium materials, designs and manufacturing process we apply to all our Quest Elite® furniture the Autograph range takes the 'pack away' range to a whole new level.

**Quest Elite® Autograph range** : Every model is available in paprika and cream as well as black and grey
