# Westfield<sup>®</sup> | AIR SYSTEMS

OUTDOORS | How do they work ?

Our Westfield by Quest air awnings come with either the **AAS** (Advanced Air System) with its great feature list and adaptability or the simplistic and easy to use **AES** (Air Erect System)

The Advanced Air System (AAS) is a high specification air tube system. It has been created to give you the benefits of both a multi-inflation system as well as the ease of use of a single inflation system. The system uses 4 layers for strength and stability.

- **Layer 1:** The internal bladder which is the part that you inflate.
- **Layers 2 and 3:** Then we have a dual layer protective cover that has PE and polyester covers bonded together, the PE layer of the cover is also reinforced at the stress points giving it extra strength and stability.
- **Layer 4:** Finally we have a sleeve which is sewn into the awning. This improves the protection around your air tube, as well as the stability of the awning because the tube is held in position better.

The Advanced Air System goes one step further than its rivals by giving you the option of multi-inflation or single inflation. No longer do you have to choose between single or multi-inflation, you can have both and use whichever is better for you.

The single inflation system can be inflated by any of its independent valves giving you the maximum of flexibility. In the event of a failure, you can simply just remove the affected tube and the system reverts automatically to an independent tube system.

The Air Erect System (AES) is an, easy to use, air erect system. Simplified to make it easier to use and less to go wrong, the system uses 4 layers for strength and stability.

- **Layer 1:** The internal bladder which is the part that you inflate.
- **Layers 2 and 3:** Then we have a dual layer protective cover that has PE and polyester covers bonded together, the PE layer of the cover is also reinforced at the stress points giving it extra strength and stability.
- **Layer 4:** Finally we have a sleeve which is sewn into the awning. This improves the protection around your air tube, as well as the stability of the awning because the tube is held in position better.

The Air Erect System has individual air tubes rather than a joined system which makes each tube extremely easy to pump up, so if there is a failure only one tube is affected.

It also uses an easy to use single way valve for inflation which is simplicity itself; simply push the pump in and pump.

# Westfield<sup>®</sup> | FABRICS

**OUTDOORS**

Available Fabrics for your Westfield by Quest air awnings

The fabric is a major part of the performance and lifespan of your awning and with Westfield by Quest you have four levels of fabric giving the best balance of performance / lifespan / weight and value.

### HydroTech

• **Fabric density: 300D** • **Waterproof rating: 10,000mm HH**

An extremely luxurious and high performance 300D material which is unlike any other. Based on the excellent HydraDore XT Pro then improved with a high end double coating (inside and out) to give you the very highest waterproof rating as well as extra durability and protection from the sun. The coating is also nicer to touch and feel. The waterproof performance and feel of this material is unsurpassed in the market and is only rivalled by performance clothing.

### HydraDore SL PRO

• **Fabric density: 150D** • **Waterproof rating: 4,000mm HH**

An advanced middleweight 150D material with a high performance coating. It keeps the weight down making the awning easier to use, pack away and erect. The high performance coating adds durability meaning it will last longer and gives a very high level of waterproofing and protection against the weather.

### HydraDore XT PRO

• **Fabric density: 300D** • **Waterproof rating: 6,000mm HH**

A luxurious and high performance 300D material. It is woven in a completely new way giving it a higher tensile strength than standard 300D ripstop materials. The coating helps add extra durability, makes it easier to clean and has an extremely high level of waterproofing. It is also thread dyed rather than dip dyed. This means each individual thread has been dyed before it is woven together, allowing more dye to penetrate each thread creating a better and longer lasting colour.

### HydraDore SL

• **Fabric density: 75D** • **Waterproof rating: 3,000mm HH**

An advanced lightweight 75D with a high performance coating. The coating gives the material extra protection against the harmful sun's U.V. rays and extends the life of your awning and gives you a high level of water protection. The material is extremely lightweight making it easy to handle, fold and packs away to a small size. It is fast drying as it does not soak up the rain and is easy to clean.

Suitable for vehicles with an A-frame size of 946 - 1085 cm

# Westfield® | PLUTO

OUTDOORS

The Pluto is a traditionally styled full air awning. This is a true top of the range, luxury air awning with performance, style, classic looks and durability built in. This is a full awning, which means that it goes around the entire awning channel on your caravan. This gives it a stronger, more weather tight connection against your caravan and utilises 100% of the space against your caravan. It also ensures that all of the windows are free from obstruction.

It features the simply amazing **Hydrotech** fabric which gives unrivalled performance, amazing looks, great feeling to touch, and the very best protection against the elements.

The **Advanced Air System** gives you single inflation from the start, ease of use and reliability. You get **Super-tubes** which are larger, stronger and more rigid than its rivals. This allows the awning to have less beams making the inside far more roomy and more aesthetically pleasing. The high specification bravo pump also makes it easier to inflate.

There are no hidden extras here, you even get a veranda pole. It can also be extended with 1 or 2 annexes allowing you to increase the living or storage space if required.

The removable front and side panels make it easier to pick up and slide though your awning channel, helping to make this awning easier to erect. The front and side panels have large tinted windows giving excellent sun cover and every panel has a large double layered mesh window allowing you to have very high levels of airflow when the weather is nice.

It has more panoramic views than all of its rivals and features maximum sized windows to give you the very best views. They go lower to the floor letting more light in adding that extra feeling of space and light all the time. The awning also features unique side doors which includes an additional window panel, giving even more views and light in from the side.

Total weight (kg)	38	40	42	47

The awning weight above is without panels

Suitable for vehicles with a fitting height of 235 - 250 cm

# Westfield<sup>®</sup> OUTDOORS | OMEGA

The Omega is a high end, luxury porch air awning. Its a traditionally styled large porch awning giving you similar space to a full awning, but with the added flexibility of a porch awning.

It features the amazingly strong **HydraDore XT PRO** material which gives you unrivalled strength and helps ensure your awning lasts for years. The Omega features the **Super-Tubes** as well which are larger, stronger and more rigid than its rivals. It also ensures the awning flexes less in the wind.

You get the brilliant **Advanced Air System** which gives you single inflation from the start, plus in the unlikely event of an issue you have with the ability to remove tubes on-site, by yourself, allowing you to fix quickly and continue enjoying your break. You also get the high specification bravo pump making it easier to inflate than ever before.

Additional (optional for use) storm poles are also included. There are no hidden extras here, you even get a veranda pole giving you more options. It can also be extended with 1 or 2 annexes allowing you to increase the living or storage space if required.

The removable front and side panels make this easier to pick up and slide through your awning channel, helping to make this awning easier to erect.

Windows, windows and even more windows, the huge, full size panoramic windows to the front and side mean you get perfect views all around giving you the feeling of being outside even when inside.

You also have the emergency support system to ensure that in the unlikely event that there is an issue, you are supported and your awning will not come crashing down around you.

Suitable for vehicles with a fitting height of 235 - 250 cm

**HydraDore XT PRO**

**ADVANCED AIR SYSTEM**

# Westfield® | ARIES

**OUTDOORS**

The Aries comes in two sizes; 350 and 260. It has large, scenic windows which gives you amazing views and allowing loads of natural light in, this is further improved by the skylights in the roof, which come with blinds, but can also be left open to let even more light in. It can also be extended using the optional (sold separately) annex.

It features the excellent **HydraDore XT PRO** fabric which means that this awning is amazingly strong, yet lightweight and will last for years. It has the unique **Advanced Air System** which is the only system available that gives you the option of single or multi-inflation. You can have the cost saving benefit of multi-inflation or choose the optional single inflation kit (sold separately) to upgrade it to full single inflation at any time.

The removable front and side panels make this easier to pick up and slide through your awning channel, helping to make this awning easier to erect. The side panels have double zips on, which means all you need to do to add an annex is pitch your awning as normal and then simply zip the annex in place. It also means you can leave your side panel on when the annex is in use.

The awning comes with storm straps as standard and even has storm strap pockets allowing you to put them away safely and securely when taking the awning down. This stops them getting tangled up with the canvas making the awning easier to pack away. Completed with lightweight aluminium poles for the rear draught pads and a draught skirt this awning comes with everything you need.

Total weight (kg)	24.5	27.5

The awning weight above is without panels

Suitable for vehicles with a fitting height of 235 - 250 cm

# Westfield® OUTDOORS | DORADO PRO

The Dorado Pro comes in one size, 400 and is an improved version of the standard Dorado. It has a larger space, improved headroom and a higher specification fabric and performance. The larger size and headroom make it feel much larger inside. The awning as standard only has a single air beam which means that it is also single inflation.

It uses the **HydraDore SL PRO** fabric which gives you a higher specification fabric, whilst still keeps the weight down ensuring this is still a very lightweight awning and helping to ensure it can be pitched by a single person. The lightweight nature of the awning means that it is also easy to pull the awning through the awning channel on your caravan.

The Dorado Pro gives you a great amount of space and light inside. The added durability of the **HydraDore SL PRO** fabric means it will last longer and perform better for a longer period.

It comes complete with a storm roof pole giving you added strength and stability. This also helps stop some of the bend and flex you get with air awnings and is the perfect place to hang a light. Thanks to the use of the **Advanced Air System**, you can replace the storm roof pole with an additional air beam (purchased separately) which is connected once and then left in place (it is not taken out when the awning is taken down) and gives you the extra strength and stability, without the need for a storm pole.

The front panel features two independent doors that can be zipped together as one large panel. The panel can also be used as a sun canopy when used with the optional (purchased separately) canopy pole kit. This allows you to use the front as doors, sun canopies or both a door and canopy. You can even roll the entire front up (as shown in the image above) and doors back to give you a great large canopy.

Width (cm)	400
Pack size (cm)	105 x 28 x 28
Awning weight (kg)	7.5
Total weight (kg)	10.5

Suitable for vehicles with a fitting height of 235 - 250 cm

**HydraDore**  
SL

**AES**  
AIR ERECT  
SYSTEM

Dorado shown with optional canopy pole kit

# Westfield® OUTDOORS | DORADO

The Dorado comes in one size and is all about ease of use. It combines the naturally easy nature of a lightweight awning along with the simply and very easy to use **Air Erect System (AES)** means you get one of the simplest and easiest to use awnings available.

The efficient **Air Erect system** combines simplistic reliability and ease of use in one great system. The system is kept simple, making it very easy to use and extremely reliable as there is little to go wrong; a perfect combination.

The use of a single air beam ensures this awning is single inflation and means that this awning can be erected in as little as 12 repetitions. Combine this with the excellent lightweight **HydraDore SL** fabric means that this awning can easily be erected by one person. The fabric is also very quick to dry making the awning easier to manage and use.

Added stability can be gained by the optional storm poles (purchased separately) giving you benefit in adverse weather conditions and making this lightweight awning great for use in many different weather conditions.

The large windows on the awning allow a great amount of light inside and the front panel features two independent doors that can be zipped together as one large panel. The panel can also be used as a sun canopy when used with the optional (purchased separately) canopy pole kit. This allows you to use the front as doors, sun canopies or both a door and canopy (as shown in the image above). You can even roll the entire front up and doors back to give you a great large canopy.

This really is an extremely easy awning to erect, use and live with; the perfect, lightweight air awning.

Width (cm)	350
Pack size (cm)	103 x 28 x 26
Awning weight (kg)	6.25
Total weight (kg)	9.5

Suitable for vehicles with a fitting height of 235 - 250 cm

# Westfield® OUTDOORS | LYNX

The Lynx comes in two sizes, the 200 and 240 and is a lightweight awning with a small footprint. Extremely easy to use, easy enough to erect by one person.

The small size is perfect when space is at a premium and when you only want a small porch. Whilst small the Lynx is still large enough for two chairs and a small table. The use of the efficient and simple **Air Erect System (AES)** means that the tubes are independent of each other and can be inflated with as little as twelve repetitions on the pump. It comes with a storm pole to add stability in adverse weather conditions.

Featuring the lightweight **HydraDore SL** fabric that gives you great performance in a lightweight fabric which makes this awning even easier to erect, use and store away when not in use. The fabric also dries quickly, making it even easier to manage.

The oversized large front window on the Lynx allows a huge amount of light into the awning, making it feel roomy and gives the perfect views when inside. All the windows feature internal blinds giving you privacy when needed and light and views when not.

The Lynx 200 is also the perfect awning for all Swift Basecamp owners. It fits the rear of the caravan so well you would believe that it has been designed to do so. It fills the entire rear section of the Basecamp creating the perfect extra covered area on your van. The draught pads simply push against the side of the caravan to give you a good seal and help keep the weather out.

The Lynx is the perfect, lightweight awning when space is at a premium or when you simply want a small porch.

Width (cm)	200	240
Pack size (cm)	115x25x25	115x25x30
Awning weight (kg)	6.25	7
Total weight (kg)	10	10.5

Suitable for vehicles with a fitting height of 180 - 245 cm

# Westfield® | HYDRA OUTDOORS

The Hydra comes in two sizes (low and mid) and is an excellent medium sized motor home awning that is amazingly easy to use; it can also be used on a caravan, especially specialised low height caravans.

It uses the efficient **Air Erect System (AES)** which is very simple and easy to use system which makes the awning extremely easy to inflate and easy to erect, so much so that it can even be done by one person.

The addition of the door in the tunnel allows you to enter and exit the awning without walking through the main awning; perfect when you have muddy boots and wet coats.

It has a large number of windows (four on the sides and three across the front) which allows you to get a great amount of light inside making it feel light and airy and giving you great views all around. All the windows have blinds allowing you privacy when required.

There are also half and half side windows (half window and half mesh panel) which allow not only light but increased air flow when the weather is nice helping the inside to stay cool and perform better.

The use of the superb **HydraDore SL** fabric means that this is extremely lightweight, making it even easier to carry, store, use and erect. It is also quick to dry, which helps make it easier to manage. The highly effective U.V. coating helps to prevent damage from the sun's rays and prolong the life of the awning.

The sewn in, fully tubbed groundsheet is great at keeping the weather out, but with the added peg down doorways, you can also remove those annoying trip hazards when the doors are in use.

Model	low	mid

Westfield performance range

Quest Lakeland range

Westfield avantgarde range

The Quest Elite Signature range are a premium set of classic and modern tents. All are made to the very highest standards with traditional materials and modern production to give the very best in camping.

For a full list and details visit [www.questleisure.com](http://www.questleisure.com)

### Quest Tec FullC Fabric

A premium fabric, this is no part cotton and part polyester fabric, it is a true 100% full cotton canvas, which is stronger and more tear & rip resistant and more U.V. resistant than both polyester and polycotton. The fabric is treated against mould, rot and U.V. degradation giving it extra durability, extra strength and extra protection. The fabric treatment is a premium impregnation process and not simply a coating which ensures the very best protection and also ensures the fabric keeps its breathable nature. This is a true, premium fabric giving you the very best of everything in one fabric. The breathability of this fabric means that the tent feels cooler in the summer and helps avoid condensations as it allows the tent to breath. It is also warmer in the colder months as the material is thicker than its polyester and polycotton rivals and has more natural insulation to help keep the warmth in.

### Sustainable Fabric

Very much in everyone's thoughts these days are ecological products, sustainability and green issues. The fabric on all our Bell Tents are 100% cotton and come from 100% sustainable sources. This is fair better for the environment, the planet and our future generations.

### Scenic Windows

Bell tents usually do not have windows, but this bell tent does. Windows are great in tents they allow light in and keep the weather out, allowing you to use them all year round. This tent has them built in from the start. They are premium quality crystal clear windows giving you great and unobscured views and have internal zipped blinds. This gives you the ability to zip them shut for additional privacy whenever you want.

### Single Person Pitch

This tent can be pitched by a single person, although it is quicker to do it with two. We test pitch every tent ourselves and only tents that we pitch with one person, without any need for extra help get this feature.

### Pitch Times

The pitch times on these tents are incredibly low, far lower than you would expect. All our pitch times are tested by ourselves and can be viewed online in the full length, non edited videos. Our pitch times are 100% complete pitch times and include the time taken to peg every single pegging point and guy rope.

### Fully Zipped in Groundsheet with waterproof zip

All our tents feature a fully zipped in groundsheet, which allows you to unzip the groundsheet from the main tent. This gives you the ability to use the 360 Vista view and makes it easier to manage as whilst unzipped the groundsheet can be taken away and cleaned separately from the main tent. The groundsheet itself is a heavy duty, premium 540gsm full PVC material, which is extremely hard wearing, durable and easy to clean. It also gives you extra protection from the ground and adds strength and stability to the tent as the groundsheet becomes an integral part of the unit. The zip itself is a premium waterproof zip which adds even more weather resistance and helps keep the inside warm, dry and cosy.

### 360 Vista View

This feature allows you to roll up the entire side wall of the tent up and toggle in place. This leaves you with a stunning 360 degree view all around and a magical floating roof. On those really hot days this can be a great benefit, a really different way to appreciate, use and have fun with your tent. All this is done without the need to pitch or re-pitch your tent, you simply unzip the side wall from the groundsheet, then roll it up and secure in place with the in-built toggles.

### No-Chill premium mesh

This tent has built in ventilation using the Quest premium no-chill mesh. This mesh is extremely strong, durable and hard wearing. It is pull and damage resistant and looks great. The structure and build quality of the mesh allows the air in, but keeps the wind chill out. When wind blows against this mesh the air is allowed through, which enables perfect air circulation, but it stops the wind so you don't feel the wind chill. Our mesh panels all have premium zipped internal blinds which allows you to fully close the vents when you want to.

### Inner Tent Ready

All the bell tents are inner tent ready, which means they can have at least one inner tent fitted inside to give you that sleeping pod / sleeping area. The inner tent is simplicity itself, to fit it all you do is clip the inner tent in place using the toggles on the inner tent and the sewn in toggles points in the tent. If you don't want to use the inner tent during the day, you can simply remove it or even just drop it to the floor.

### Pitch times

1 Person: **13 mins**  
2 People: **8 mins**

**Quest Tec FullC**  
100% cotton, fully breathable  
100% comfort

**6M New for 2020**

# QUEST ELITE® Signature | BELL

The Bell comes in three sizes, 4M, 5M, 6M and is a premium quality, full cotton, canvas frame tent with an extra thick PVC zip in groundsheet which makes this a fantastic family friendly tent or perfect for a couple who want that bit more space. Sleeping anywhere from 1 – 10 adults we have the perfect size for every requirement.

Featuring the premium **Quest Tec FullC** 100% cotton material, this means no more worrying about “is my tent leaking or is it condensation?” as this is a fully breathable material. Not only is it breathable, the cotton material has much better insulation properties which will keep the tent cooler in the summer and warmer in the colder months giving you much more comfort than a polyester or polycotton tent and enabling you to camp all year round.

The tried and tested design has been around since the 9<sup>th</sup> century so you can be confident that this tent will be ready for action whether in the summer or the heart of the winter.

The heavy-duty **Fully Zipped PVC groundsheet** can be removed when pitching and taking down making it easier to pitch, put away and helping to keep the main unit clean even when the ground is muddy. With the groundsheet unzipped, you can then roll up the sides and allow your Emperor to float in the air, allowing the breeze to come through on those hot days and give you that ..

The steel frame construction is robust giving you peace of mind that this tent will be with you for years to come. amazingly the tent only has two poles making it easy enough for one person to pitch in only minutes.

Optional inner tent and tarps available.

# EMPEROR

Be the envy of all campers with this amazing “big top tent” and stand out from the crowd whilst also making sure you never lose where you pitched your tent again. The Emperor is the ultimate glamping tent which enables you to utilise the space anyway you want and make it different every time you go away or even adjust it for when friends come to stay.

Featuring the premium **Quest Tec FullC** 100% cotton material, this means no more worrying about “is my tent leaking or is it condensation?” as this is a fully breathable material. Not only is it breathable, the cotton material has much better insulation properties which will keep the tent cooler in the summer and warmer in the colder months giving you much more comfort than a polyester or polycotton tent and enabling you to camp all year round.

The steel frame construction is robust giving you peace of mind that this tent will be with you for years to come. Amazingly the Emperor only has six poles helping to ensure it is not only easy but quick to erect.

The heavy-duty **Fully Zipped PVC groundsheet** can be removed when pitching and taking down making it easier to pitch, put away and helping to keep the main unit clean even when the ground is muddy. With the groundsheet unzipped, you can then roll up the sides which allows your Emperor to seemingly float in the air, allowing the breeze to come through on those hot days and give you that **360° Vista View**.

This Emperor also has added scenic windows, normally not available on bell tents. This gives you great views even when the weather is bad. It has mesh panels with internal blinds around the base of the walls giving great air flow when required and full double layered mesh doors allowing an amazing amount of air flow when the weather is hot.

The tent comes complete with everything you need to set up including heavy duty pegs, pre-attached guy lines & rain cowls for the “A frame”.

# QUEST ELITE® Signature | STARGAZER

The Stargazer is a very special edition of the standard Bell tent. Based on the same layout as the Bell it has higher sides for extra space inside and a full **Stargazing roof**. This roof gives you windowed panels around the entire roof along with an umbrella style blind on the inside. This allows you to open up the roof to give you a simply stunning view of the sky whilst keeping you private and secure in your Bell tent.

The tried and tested design has been around since the 9<sup>th</sup> century so you can be confident that this tent will be ready for action whether in the summer or the heart of the winter. As the tent features the **Quest Tec FullC** 100% cotton canvas in the summer the tent will be breathable keeping it cooler compared to typical polyester and polycotton tents. Yet in the winter the insulation properties will make this tent warm and cosy so you can camp all year round safe in the knowledge that you have made the right decision.

Sleeping anywhere from 1 – 8 adults, this simple steel framed tent can be put up by one person making this one of the easiest tents to erect.

The heavy-duty **Fully Zipped PVC groundsheet** can be removed when pitching and taking down making it easier to pitch, put away and helping to keep the main unit clean even when the ground is muddy. With the groundsheet unzipped, you can then roll up the sides and allow your Emperor to float in the air, allowing the breeze to come through on those hot days and give you that **360° Vista View**.

The stargazer also has extra high sides giving extra room and added light and air inside the tent making it feel even larger inside. It has mesh panels with internal blinds around the base of the walls and thanks to their larger size gives an amazing amount of air flow when required and full double layered mesh doors allowing an amazing amount of air flow when the weather is hot.

This really takes the standard Bell tent to the next level.

Stargazer shown with optional extra large tarp.

 2 People: 11 mins

**Quest Tec FullC**  
 100% cotton, fully breathable  
 100% comfort

# QUEST ELITE® Signature | TOUAREG

Offering a more open feeling compared to other Bell tents, the Touareg has fantastic features with a unique quality. It features double layered doors at either end allowing exit and entry from both sides. These double layered doors give you perfect privacy as well as a full mesh panel for added air flow when the weather is hot.

On top of these double layered doors you get **Scenic Windows** on both sides. These aren't usually found as standard on a Touareg, but are on this model. They have an internal blind for privacy and give great views and allow more light inside, even when the weather is bad.

The steel frame construction is robust giving you peace of mind that this tent will be with you for years to come. Amazingly the Touareg only uses one centre pole and two doorway 'H frame' poles which helps ensure it is easy and quick to pitch.

The premium **Quest Tec FullC** 100% cotton canvas means there is no more worrying about "is my tent leaking or is it condensation?" as this is a fully breathable material. Not only is it breathable, the cotton material has much better insulation properties which will keep the tent cooler in the summer and warmer in the colder months giving you much more comfort than a polyester or polycotton tent and enabling you to camp all year round. The heavy duty **Fully Zipped PVC groundsheet** can be unzipped and rolled up to allow the breeze to come through on those hot days and give you that **360° Vista View**, which is a unique feature its rival do not have.

With a smaller pack size than similar sized tents on the market you will still have plenty of space in the car to make sure you pack everything you need for your trip without having to get a trailer or roof box.

Complete with everything you need to set up including heavy duty pegs, pre-attached guy lines, you are ready to go.

**Scenic windows**  
 Built in for amazing views and internal blinds for privacy

Tent weight (kg)	23
Total weight (kg)	48

Why poled awnings ? Poled awnings when designed correctly can be extremely easy to erect and help keep the price down as poles are cheaper to produce than air beams. So with that in mind we have produced a small range of poled awnings that deliver on both ease of use and value, making them the perfect choice for those on a budget, those you are after a simple second porch and those who just do not want an air awning.

For a full list and details visit [www.questleisure.com](http://www.questleisure.com)

**Single Person Pitch**  
So easy, it only takes one to pitch

### Single Person Pitch

These awnings are so lightweight they can be fed into the awning channel by a single person. They are also very easy to erect and peg, so they can be pitched by a single person. Before we give an item the single person pitch logo, we test them by fully pitching them ourselves with one person.

**Minimal Quick-Fit**  
Small, quick, easy poled frame.

### Minimal quick pitch frame

The minimal quick-fit frame system means it uses the minimal amount of poles making it smaller and easier to use. The frame is also adjustable. This is extremely useful when you pitch on uneven ground. Thanks to its adjustable nature it can be extended or shrunk to cater for uneven ground, slopes or obstacles which you can find on a large number of pitches, helping you to pitch correctly at all times.

**Rear Draught Pads**  
Better seal, better fitting.

### Rear Draught Pads

These rear draught pads mean that when up against your vehicle it makes a better, tighter seal against the side of the van giving you a better fit.

The pad can also help if you find you have a gap between the tunnel and your vehicle as it can be used to fill this gap. It also means you can use the optional (purchased separately) rear poles which push the draught pads against the vehicle giving you an even tighter seal and better connection.

**Very Small Pack Size**

### Very Small Pack Size

The combination of the minimal quick-fit frame system and lightweight fabric allows the awning pack down to a very small size, much smaller than you would think for an awning. This makes the awning easier to store away when not in use and easier to pack into your vehicle when loading ready for your break.

**Quest Tec75**  
Lightweight Performance Fabric

### Quest Tec75 Fabric

This is a modern, lightweight fabric. It has a high performance coating giving it a very high waterproof rating, whilst helping to keep the weight down and the pack size smaller.

The fabric is naturally water repellent, which means it quick to dry, making it easier to dry the awning back at home if it is put away wet. It also means that it is easy to clean as the majority of dirt is just washed off with water as the dirt is not 'soaked in' like it can on some heavier fabrics.

- Fabric Density: 75D • U.P.F. Rating: 50+
- Waterproof rating : 3,000mm Hydrostatic Head

**Drive Away Kit**  
Built in, ready to go. No extras required

### Built in Drive Away Kit

This awning has dual (4 and 6mm) beading sewn into the tunnel to ensure it can be used on any type of connection.

The beading can also be zipped on and off, removing the need for a drive away kit as you simply unzip the beading when you want to drive away and zip it back on when you come back. This also allows for a much better connection to the vehicle. When using a drive away kit you have a number of figure of eight pieces and double sided beading strip in between your awning and vehicle. This is not a strong or as stable connection as this single zipped beading and the single, zipped beading also means the awning is closer to your vehicle, thus reducing the potential for a gap at the back by the tunnel allowing for a better connection.

Suitable for vehicles with a fitting height of **235 - 250cm**

**Quest Tec75**  
Lightweight, Performance Fabric

**Minimal Quick-Fit**  
Small, quick, easy poled frame.

**New for 2020**

# QUEST | FALCON

leisure products

The Falcon porch comes in four different sizes (220, 260, 325 and 390) and is a lightweight poled porch awning, that is high on features, ease of use and low on weight and cost.

The awning is all about ease of use and value. It features an easy to use, **minimal quick-fit pole system**. This pole system is quick to put together, lightweight and adjustable to help ensure the best pitching even on uneven ground. It has one single pole at the front of the awning. This single pole ensures that it is quick and easy to erect, helping to ensure that this awning is easy enough to be pitched by a single person.

The awning has features such as full mesh doors, roll down, half or full blinds, roll up front panels, sun canopy fronts (if used with the optional universal canopy pole kit).

It uses the modern **Quest Tec75** fabric which is lightweight, quick drying and extremely waterproof making the awning easier to use and maintain. The very lightweight nature of the fabric also ensures that it can be easily pulled through the awning channel on your caravan. So much so that it can be done by one person.

The fabric is also U.V. coated helping to protect it from the harmful UV rays which helps extend its lifespan and gives you an amazingly high U.P.F. rating of 50+ which gives you a great level of protection.

All this plus a very small pack size, light weight and amazing value makes the Falcon an excellent awning for the weekend, first timers, the budget conscious and just about anyone after an easy to use lightweight porch.

# QUEST | FALCON

leisure products

The Falcon drive away comes two heights (low and tall) and is a lightweight poled drive away awning, that is high on features, ease of use and low on weight and cost.

The awning is all about ease of use and value. It features an easy to use, **minimal quick-fit pole system**. This pole system is quick to put together, lightweight and adjustable to help ensure the best pitching even on uneven ground. Poles are kept to a minimum and only has two poles to ensure that it is quick and easy to erect, helping to ensure that this awning is easy enough to be pitched by a single person.

With windows all around you get amazing views from anywhere in the awning and loads of light to make the internal space feel bright and airy. Every window has its own internal blind allowing you privacy when required and light and air when not.

It uses the modern **Quest Tec75** fabric which is lightweight, quick drying and extremely waterproof making the awning easier to use and maintain. The fabric is also U.V. coated helping to protect it from the harmful UV rays which helps extend its lifespan and gives you an amazingly high U.P.F. rating of 50+ which gives you a great level of protection.

The awning has features such as full mesh doors, roll down, half or full blinds, roll up front panel, sun canopy front (if used with the optional universal canopy pole kit, which is purchased separately). It also has a feature nobody else does: A **built in drive away kit**: The tunnel beading can be zipped on or off which allows you to use it without the need for a drive away kit and gives you a better connection than when used with a drive away kit.

All this plus a very small pack size, light weight and amazing value makes the Falcon an excellent awning for the weekend, first timers, the budget conscious and just about anyone after an easy to use lightweight drive away awning.

## The Quest Screen Houses.

These are the original, instant pop up screens houses. The quickest and easiest to use gazebo and shelter on the market.

*The Original  
and still the best*

We have been producing the Screen House for over 6 years, longer than any others. In that time we have been improving the Screen House all the time and it means that it is the best, quickest, strongest and longer lasting than its rivals. Some of the innovation and changes cannot simply be seen, but together make our screen house perform better and last longer than the others.

### Single person pitch and in less than 60 seconds

We have designed and built the Screen House to be erected by a single person. Everything about it, is catered to ensure that it can be done by one person. We test the Screen House ourselves to ensure that it can be erected by a single person. We even use our own office staff and members of the general public to test it as well. On top of this we time it ourselves and have proven time and time again that it can be erected by a single person in under one minute, so we give it both the single person pitch and 60 seconds to erect logos.

### Quest Tec210 fabric

This is a modern, middleweight performance fabric. It is stronger and will last longer than its cheaper rivals. It has a high performance U.V. coating giving it the 50+ rating. It is also fully waterproof, whilst keeping the weight down making it easier to use.

**Fabric Density: 210D • Waterproof rating : 2,000mm Hydrostatic Head**

### U.V. 50 Plus

The Screen House has a U.V. rating of 50+, the highest available. This gives you excellent protection from the sun, especially important when the screen house is being used as a shelter for the younger ones.

### NO Chill Pro Mesh

The screen house uses our No-chill PRO premium mesh. This mesh not only allows great views, but stops the wind chill factor allowing it to feel cooler in the sun than standard fabrics, but also warmer in the wind than its cheaper rivals. It is also stronger, lasts longer and is less prone to snags and marks than the others.

### Premium Hub System

We are on our 4<sup>th</sup> generation of premium hub system. This is the centre of the Screen House frame system and its single most important part. Our premium hub is simply stronger and more reliable than anyone else's. It is also repairable if anything should happen to it, ensuring piece of mind for years to come.

The best example of just how well made our screen houses are is that we use our screen house demonstrator for at least two years. During those two years it is goes though approximately 15 years worth of usage as it goes up, down, up down all day long during shows and more. At the end of those two years they are still working fine and replaced only as logos and features are added.

**Pitch times**

 Lightweight, Performance Fabric

*The Original  
and still the best*

# QUEST | SCREEN HOUSE PRO

leisure products

This is the Pro version of the best selling Screen House. It is still the simplest, quickest, easiest and best gazebo on the market, still comes in two sizes (4 and 6) and is built and designed so one person can erect (or take it down) in less than one minute.

It has all the benefits from the premium **No-Chill PRO** mesh panels, with additional sewn in and fully zipped **Quest-Tec 210** side walls. This gives you an un-rivalled amount of options. You can roll the side walls down for complete privacy. Open the external blinds for windows to allow light and views in, or roll the entire side wall up to reveal the premium quest **No-Chill PRO** mesh sides allowing it to be warmer in the wind and cooler in the sun.

It uses the latest generation **premium hub system** which has been improved on again making it smaller, lighter and more durable, whilst maintaining its ease of use and ability to be repaired if required.

The **Quest Tec 210** fabric gives you a waterproof roof and the excellent coating helps lengthen its life span. It also has a **UV rating of 50+** giving you great protection from the sun.

The Screen House Pro also features the new accessory zip. This is a full zip that runs around the entire front of the doorway(s) allowing for additional accessories to be attached to extend the features of your screen house.

The Screen House 6 Pro also has an additional door giving you two entrances/exits and allows you to zip up to 6 of them together to create a Screen House village.

# QUEST | SCREEN HOUSE

leisure products

The Screen House is the original, quickest, easiest and best gazebo on the market. It comes in two sizes (4 with 4 sides and 6 with 6 sides) and is built and designed so one person can erect (or take it down) in less than one minute.

There is nothing to build, put together, tension or inflate, you simply take it out of the bag, unfold it and pull/push the sides and roof and it springs into position - fully set up and ready to peg.

It uses the latest generation **premium hub system** which has been improved on again making it smaller, lighter and more durable, whilst maintaining its ease of use and ability to be repaired if required.

It comes with pegging points on every corner and in the middle of each side giving you great ground anchorage. It has storm straps on every side ensuring it stays up in adverse weather and makes it sturdier than any gazebo you are used to.

The premium **No-Chill PRO mesh panels** are built in, these help keep you warmer in the wind and cooler in the sun, but allows the air to flow ensuring no gas build up can occur inside.

The **Quest Tec 210** fabric gives you a waterproof roof and the excellent coating helps lengthen its life span. It also has a **UV rating of 50+** giving you great protection from the sun.

**New for  
2020**

# QUEST | SCREEN SHELTER

leisure products

This is the all new Screen Shelter. It is a lightweight version of the amazing Screen House.

Rather than using the premium 4 hub system as featured on the screen houses it uses latest generation of the **Zero Tension Frame**. This makes the Screen Shelter lighter and pack away to a smaller size. It only takes a couple of minutes to erect and can be done by a single person. Also as the frame ensures the perfect tension every time and as there is nothing to put together, as soon as it has been clicked into place you are ready to peg.

The **Quest Tec 210** fabric gives you a waterproof roof and the excellent coating helps lengthen its life span. It also has a **UV rating of 50+** giving you great protection from the sun.

It has 2 large double doors giving you an entrance and exit on both sides. All the sides and doors are completely covered with the premium **No-Chill PRO mesh panels** which help keep you warmer in the wind and cooler in the sun, but allows the air to flow through. This means that you are safe to use gas appliances inside the shelter (as long as they are far enough from the sides) as the mesh sides and air flow ensures no gas build up can occur inside.

The shelter can be extended with the optional (purchased separately) side walls to give extra privacy and weather protection, or the excellent front canopy which gives a sheltered area to the front, perfect for cooking under or simply relaxing under shade when the weather is hot.

Optional canopy and side walls available.

# Add-ons

Accessorize your screen house or shelter

### Screen House Side Walls

The Screen House side walls. Sold in pairs, they add extra weather protection to your existing screen house 4 or screen house 6. They simply velcro and hook in place and include an oversized eyelet in the middle to allow the storm strap to be passed through.

New for 2020

### Screen House Pro Canopy

The Screen House Pro canopy. Built to fit both the Screen House 4 Pro and Screen House 6 Pro. It simply zips onto the existing accessory zip on your screen house pro and instantly gives you a large canopied area to the front.

### COMING SOON - Screen House Pro Vehicle Connector

Built to fit both the Screen House 4 and 6 Pro and connects to vehicles between 180 and 210cm. It simply zips onto the existing accessory zip and instantly gives you tunnel connector with two doors on allowing you to connect your screen house to your vehicle.

New for 2020

### Screen Shelter Canopy

The Screen Shelter canopy. Built to fit the Screen Shelter 4. It simply clips into place and instantly gives you a large canopied area to the front.

New for 2020

### Screen Shelter Side Walls

The Screen Shelter side walls. Sold in pairs, they add extra weather protection to your existing screen shelter 4. They simply velcro and clip in place in seconds giving you extra privacy and weather protection.

## Screen House and Shelter Accessories

Optional Extras for your Screen Houses and Shelters

## The Quest wind break range.

We have three distinct styles of wind breakers, one to match the Westfield Outdoors awnings, one to match the Screen Houses and shetlers, plus one to match the Quest Falcon awnings..

For a full list and details visit  
[www.questleisure.com](http://www.questleisure.com)

### The Windshield Pro - Expert Edition

Simply the best modular wind breaker system around. It starts from the 3 panel main unit and can be extended using the additional panel(s), other main units, a weather canopy and even a door. Solid, stable, reliable, lightweight and a small pack size to boot, simply perfect

#### HydraDore SL Pro fabric

An advanced middleweight 150D material with a high performance coating. It keeps the weight down making the windshield easier to use, pack away and erect, but the added durability means it will last longer. The high performance coating adds durability and gives a very high level of water proofing and protection against the weather.

**Fabric Density: 150D • Waterproof rating : 4,000mm Hydrostatic Head**

#### Very Small Pack Size

The windshield packs down to a very small size, into its own premium carry bag making it extremely easy to store away and carry when not in use. The poles all break down in half to make the bag size smaller and the lightweight fabric rolls and folds very small. The lightweight frame also helps keep the total weight down to a very small 6KG, making it one of the lightest windbreaks on the market.

#### Strong and Secure

There are a number of unique features on the windshield that all combine to make it extremely solid and stable even in adverse weather conditions. The solid, locking frame means that the windshield is held in place no matter which direction the wind blows. All the poles lock into position and lock together making an all together solid windbreak.

### The Wind Blocker

All about style and luxury. Made from the same Quest Tec FullC 100% sustainable cotton fabric as the Quest Elite Signature range, this windbreak stands out. It is completed with the same premium, heavy duty guy ropes and sliders so it matches the bell tents perfectly and looks amazing in any situation

#### Quest Tec FullC 100% Cotton fabric

A true premium fabric, it is a full 100% cotton canvas. This is no part cotton and part polyester fabric, it is a true 100% full cotton canvas. Cotton is more U.V. resistant than polyester and polycotton and the fabric is treated against mould, rot and U.V. degradation giving it extra durability, extra strength and extra protection against the elements. The process that treats the fabric is also a premium process and not simply a coating. The process ensures that the treatment impregnates the material fully which ensures the very best protection for the fabric and also ensures the fabric keeps its breathability. So this is a full 100% cotton material, treated against the elements, waterproof and is still a breathable material giving you the very best of everything in one fabric.

The fact that this is 100% cotton also means that it is stronger than its polyester and polycotton rivals and has no need for ripstop as the fabric is already extremely tear resistant. Even in the event of an issue cotton material is repairable, so you can repair it if required.

#### Sustainable

On top of all the good things you get from the Quest Tec FullC fabric it is also made from a sustainable cotton source. This means it is more ecologically sound and better for our earth. Being sustainable means that it is being made from pre-existing managed areas lowering the carbon footprint of the fabric.

 SIL PRO

**New for 2020**

# The Windshield Pro - *Expert Edition*

The ultimate windbreak, just got better.

The Windshield Pro is the very best windbreak available. It is lighter, more expandable, more secure and more stable than its rivals.

It has a **patented frame system** that has been designed with one job, to deliver the very best windbreak possible. One of the patented parts are the connector at the top of the leg support poles. This simple fitting firstly locks the leg support pole in place, it also strengthens the top bar of the windshield making it stronger against the wind and even helps stop the bars moving in the wind, where rivals simply pops off in the wind.

The Windshield Pro can be slid into your caravan (or motor home) awning channel (if available) allowing you to come directly off the vehicle.

The frame system locks itself in place making it easier to erect and more sturdy when in use. The unique frame system means no guy lines are required and the entire frame system can be placed on one side of the windshield ensuring you have absolutely no trip hazards and you get to use 100% of the space available.

It can be extended with a door, an additional panel and now a weather shade giving you an amazing amount of options. The Windshield is designed to go right down to the ground and with its additional pegging points held down making a secure and safe place on the inside, perfect for pets and children.

The new **Expert Edition** features the new **super sleeves / dog guard**, which gives you better connection to the ground. The sleeves act as a mud wall and draught skirt giving you better draught exclusion. Next it allows you to use additional top cross poles (purchased separately) as a dog guard feature. This dog guard feature creates a solid bar across the bottom of the panel ensuring your pet cannot push the material out of the way as it is held firmly in place with the solid aluminium bar.

This bar can also be used to help anchor the windshield to hard ground. It allows you to use ladder bands or elastics (purchased separately) to form additional pegging points that can be used easily and effectively even on hard ground.

Model	Main Unit	Add on panel	Door	Canopy
Size (cm)	480 x 140	160 x 140	80 x 140	160 x 160

# QUEST ELITE® Signature | WIND BLOCKER

This is the excellent, premium windbreak perfect for use with your bell tents or anything else.

It uses the same 100% sustainably sourced **Quest Tec FullC** fabric that the signature bell tent range use so it matches perfectly with all the models. It also means that it will last for years and look amazing when in use.

Used along with the additional tarps it can create that additional covered space you want, whilst keeping in style with your bell tent, but there aren't just for Bell Tent owners this is a stand out wind breaker for any one after a higher quality, premium windbreak that will last longer.

It comes with wooden poles to finish the look and also features the same premium guy ropes and sliders that are on the Quest Elite® Signature range of bell tents. These are premium rope giving far higher strength than standard guy lines giving you extra support and strength for those windy days. The sliders on the guy ropes are the same premium hand sized sliders which are easier to use than the smaller fiddly guy line versions, but are also much stronger and will last far, far longer.

The premium guy ropes and sliders give all this extra strength and support as well as looking great help the wind blocker last longer than its rivals.

**Quest Tec75**  
Lightweight, Performance Fabric

**New for  
2020**

# QUEST | FALCON 500

leisure products

The Falcon is a lightweight, poled windbreak that is matched perfectly with the Falcon range of awnings and is fantastic value for money.

It uses the modern **Quest Tec75** fabric which is lightweight and quick drying fabric. It is U.V. coated to help protect it from the harmful UV rays which helps extend its lifespan and gives you a U.P.F. rating of 50+ which is the highest possible giving you complete protection.

The windbreak comes in its own zipped, carry bag with dual handles making it easy to carry and store away. The windbreak breaks down to an incredibly small pack size which is excellent and makes storing it away even easier.

The windbreak is styled to match the Falcon range of awnings. It uses the same base fabric and same colours to ensure that it blends in perfectly, making it the perfect companion to any of the Falcon porch or drive away awnings.

This windbreak is not only amazing value for money, but such a small pack size makes it perfect for those with limited space, the budget conscious as well as any Falcon awning owner.

The Westfield Outdoors® range represents the very best furniture available today.

They combine the very best materials and manufacturing processes together to create the perfect folding furniture. Backed with the very best 5 year warranty available they will out perform all of their rivals.

For a full list and details visit [www.questleisure.com](http://www.questleisure.com)

## Chair Features

Here are just some of the unique features of the chairs

### DuraDore 3D mesh Fabric

The Westfield Outdoors furniture has a unique fabric called DuraDore 3D mesh. This is a padded fabric that is made for the outdoors. Firstly it is more durable than other materials so will last longer and perform better. It is better against UV damage and is a porous fibreglass pad which means even when it rains the seat dries within 5 minutes meaning it can be used in any weather. The porous nature also means that it is breathable making it much more comfortable on hot days as well.

### DuraLight Frames

Duralight is another unique material for Westfield Outdoors. It is a magnesium - aluminium alloy which is lighter and stronger than aluminium. It is weather proof so will last longer, is lighter making the chairs easier to carry and move.

**1. The Noblesse** : This is simply the lightest and thinnest pack size, high back chair available. It is so light anyone can easily pick it up.

**2. The Advancer** : Extremely strong, extremely durable classic folding chair that simply outlasts all its rivals..

**3. The Advancer XL** : This chair is all about strength. With its class leading 200KG maximum load it is simply the strongest available.

**4. The Advancer Compact** : This chair is all about pack size. It has a unique double folding frame which shrinks the pack size down to lower than all of its rivals..

**5. The Aeronaut Relaxer** : This is all about comfort. It is a zero-gravity, stepless realxer which allows you to relax at any angle, but it also has a unique frame and seat design allowing the fabric to form a wider and more comfortable seat than other relaxers.

6: Optional leg rest available for Noblesse and all the Advancer chairs.

The Quest Elite® Bordeaux Pro range is all about comfort and style.

They use the high performance materials, with a premium padding giving you maximum comfort. This is combined with a stunning style to give you a range that performs as good as it looks.

Updated for 2020

Our padded chairs are Fire retardant for your safety.

#### QTex Padded 2D mesh Fabric

This is a premium, padded stretch fabric which combines long lasting durability, great weather resistance and amazing levels of comfort thanks to its cushioned fabric plus additional padding.

The material is also breathable making it more comfortable on hot days and dries quicker in the wet days. The stretch fabric is also more durable than other fabrics meaning it will last longer as well.

#### Exclusive Slide Out Side Table

All items in this range have the exclusive slide out side table. This is an exclusive side table that simply slides out from underneath the seat of the chair and locks in place. This gives you the perfect side table at the perfect height. When you don't want the table you can simply slide it away so it doesn't get in the way.

### Chair Features

Here are just some of the unique features of the chairs

- 1. The Lounge :** The perfect sun lounger, day bed or even a deluxe camp bed. Higher than standard loungers making them more comfortable and easier to get in and out off. With the added levels of comfort and its ease of use, this is stand out lounger or bed.
- 2. The Relax :** This is simply the most comfortable chair in the range. Its a zero gravity relaxer giving you amazing levels of comfort whenever you need it.
- 3. The Easy :** Great levels of comfort with added practicality. This chair can be used on its own to eat at a table or simply relax. Add the optional leg rest and it can be turned into a full lounger.

4: Optional leg rest available for the Easy.

## Chair Features

Here are just some of the unique features of the chairs

### QTex 2D mesh Fabric

This is a premium all weather stretch fabric which combines long lasting durability, great weather resistance and high levels of comfort thanks to its cushioned fabric with soft touch feel.

The material is also breathable making it more comfortable on hot days and the stretch nature of the fabric is also more durable than other fabrics meaning it will last longer as well. The mesh fabric also means that when it rains most of the water simply runs through allowing it to dry extremely quickly and gives it better all weather performance.

### Exclusive Slide Out Side Table

All items in this range have the exclusive slide out side table. This is an exclusive side table that simply slides out from underneath the seat of the chair and locks in place. This gives you the perfect side table at the perfect height. When you don't want the table you can simply slide it away so it doesn't get in the way.

### Premium Frame

This is a premium aluminium frame, with an advanced electro-plated coating giving it a better finish, better durability and will help keep your furniture looking better for longer.

**1. The Lounge :** The perfect sun lounger, day bed or even a deluxe camp bed. Higher than standard loungers making them more comfortable and easier to get in and out of. With the added levels of comfort and its ease of use, this is stand out lounger or bed.

**2. The Recline :** The smallest packed sized chair in the range. Small and lightweight, but still with a high back, padded cushion and ergonomic back giving great levels of comfort with a low entry price. This chair can be used on its own to eat at a table or simply relax. Add the optional leg rest and it can be turned into a full lounger.

**4. The Comfort :** This is the perfect blend of the full relaxer and recline chair in one. Added levels of comfort thanks to the elastics and chair design, but the same practicality of an upright chair you can eat at the table with. The optional leg rest can be used with this chair as well to give you a great lounger as well.

**5. The Relax :** This is simply the most comfortable chair in the range. Its a zero gravity relaxer giving you amazing levels of comfort whenever you need it.

3: Optional leg rest available for the Recline and Comfort chairs.

The Quest Elite® Naples Pro range is all about style and durability.

They use the high performance materials, with a premium electro plated steel frame to give you an extremely comfortable chair, high on style with added durability.

New for 2020

### QTex Weave Fabric

This is a high quality, hard wearing fabric which gives a great balance between comfort, pack size, weight and comfort whilst keeping the price down for great value. The material is extremely durable and easy to clean helping it last longer and the quilted nature of inner gives added comfort where you wouldn't expect it at this price range.

### Added Features

This range has many added features you do not see on other chairs. Like the tilted back on the Grassmere giving added comfort, or the included clip on/off leg rest on the Ambleside relaxer giving the Lakeland range a unique feel, style and feature list simply not found on its rivals.

### Pack Away Frames and Carry Bags

Every chair in this range has a pack away frame making the packed down size nice and small. They all also come complete with their own carry bag to make it even easier to store and carry them when they are not in use.

## Chair Features

Here are just some of the unique features of the chairs

- 1. The Festival** : The classic quick and easy pack away chair. Adjustable arms and a cup holder give it added features whilst keeping its great value, extremely light weight and small pack size.
- 2. The Concert** : The larger camping chair with added comfort, adjustable arms and cup holder. A big step up from its smaller sibling the Festival, but still great value.
- 3. The Grassmere** : This is a unique swivel back chair that gives you a great camping style chair with an added swivel back feature that gives you added comfort by automatically resting in the most comfortable position for your back.
- 4. The Ambleside** : This is a relaxer chair. It has two positions (upright and reclined) along with its clip on and off foot rest to give you a relaxer that packs away into its own carry bag.

**Quest Lakeland**  
Lightweight and small pack size.

## Accessories.

Here are a small selection of the accessories we do.

For a full list and details visit  
[www.questleisure.com](http://www.questleisure.com)

## Tarps

Tarps are an amazing addition to our Bell tents, but also a great product on their own. They can be used in conjunction with a bell tent (as shown above) or on their own as a dining tarp, windbreak, sun cover and much, much more besides. They are so amazingly versatile they can be used virtually anywhere.

## Flooring

Add that extra comfort and protection from the floor.

We have a multitude of flooring for use with your awning, tent or screen house.

## Electric Pump

Add extra ease of use.

Our Westfield pump is quicker and easier to use than its rivals making it the perfect additional to your air awning.

## Deluxe Draft Skirt

Add extra storage underneath your vehicle.

This deluxe draft skirt gives you protection from the wind and draughts as well as zipped storage under your vehicle.

## Furniture Carry Bag

Protection and Storage.

Our furniture carry bag is the perfect addition to your furniture. IT makes it easier to carry and store your furniture and gives extra protection.

## 'Home is where you ...' Mats

Themed Mats for indoors and outdoors.

These fun mats are available in both heavy duty coir or washable loop pile. They are great at helping keep the dirt outside and look great too. Themed for Caravans, Tents, Camper Vans and Motor homes.

## Caravan Covers

We have both standard caravan covers for that extra protection when the caravan is in storage, plus the great towing front covers, which are used when the caravan is being towed giving you protection from stone chips and debris whilst on the move.

## Pots and Pans

UK made for quality and performance.

We have an amazing range of pots, pans, grill pans and more. All made in the UK and designed for use by yourselves.

## Bathroom Packs

Not glamorous, but essential.

Specifically designed for use in caravans and motorhomes. Everything you need in one handy and great value pack.

**Septic Tank Safe**  
All are formaldehyde free and ready to use anywhere.

## Atlas Cart

Why struggle ?

The Atlas carry cart if perfect for loading your tent, awning or furniture in, making it nice and easy to take wherever you want.

## ECO Candle & Grill

Ambiance and heat.

Add that extra ambience and heat to any occasion. Nothing can match the feeling of a real flame or fire, so take one with you !
