

DINOSAURIOS[®]

MÉXICO

THE ANIMATRONIC EXHIBITIONS FROM MÉXICO

Get the best robotic dinosaur exhibition on the market: the Dinosaurs from Dinosauriosmexico. We now circulate two editions in Europe: the Standard Dinosaur Exhibition contains 15 robots and the Large one includes 20.

Our robots have been produced applying leading paleontological knowledge from reputable research institutions: They are all life size, avoiding the problem of different scale specimens in the same exhibition. This makes our product superbly suitable for educational purposes.

Our state-of-the-art technology ensures on going operation with minimum maintenance. The models are exquisite: the skin looks natural, as do eye and jaw movements. You could imagine these creatures are alive, standing next to you!

In addition to animatronic models, our exhibitions include fossil casts and paleontological models. Together, they build up an intriguing story about the life and death of these magnificent creatures that once roamed our planet. The exhibition brings evolution to life for children and adults alike.
