

TRAVELLING EXHIBITION

SENSORY ODYSSEY

A MULTI-SENSORY JOURNEY TO EXPERIENCE THE SPECTACULAR WORLD OF THE SPECIES WITH WHOM WE SHARE OUR PLANET.

Inside giant immersive and wordless installations, visitors make their way through various ecosystems, experiencing changing scales and viewpoints. Equipped with an enhanced sense of smell, sight and hearing, they discover the world of living things and the richness of interactions between species.

SENSORY
ODYSSEY

A SPECTACULAR-EXPEDITION

AN ORIGINAL CONCEPT

More than an immersive exhibition, Sensory Odyssey offers a multi-sensory journey based on original cinematic, olfactory and soundscaping creations. Through the discovery of these spectacular natural environments, visitors are able to interact with the living world, trigger acceleration effects and experience changes in scale that allow them to experience microscopic life like never before.

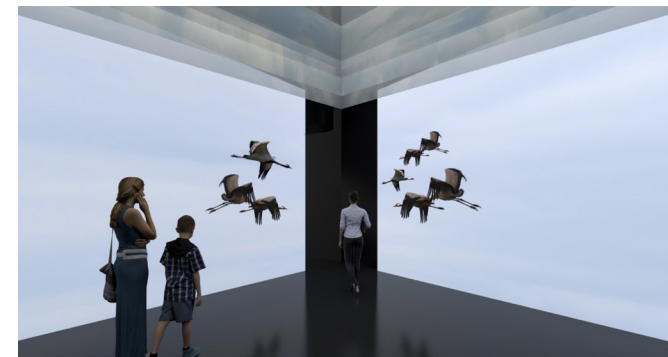

A NINE STEP VISIT

A JOURNEY THROUGH 9 HABITATS

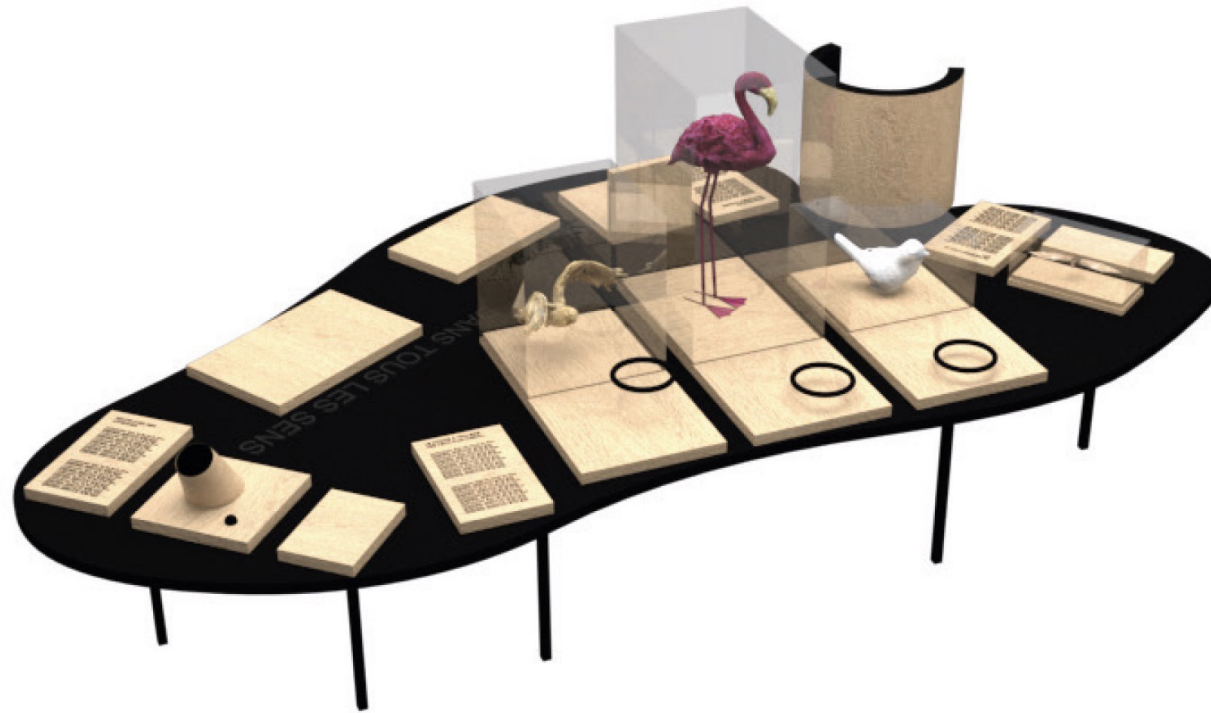

From the salt lakes of the savannah, to the Arctic Circle, through the rainforest canopy, the depths of the earth and coral reefs, visitors can explore nine natural environments. During their journey, they encounter many species: plants, animals, bacteria and fungi.

BACK FROM EXPLORING POST-SHOW

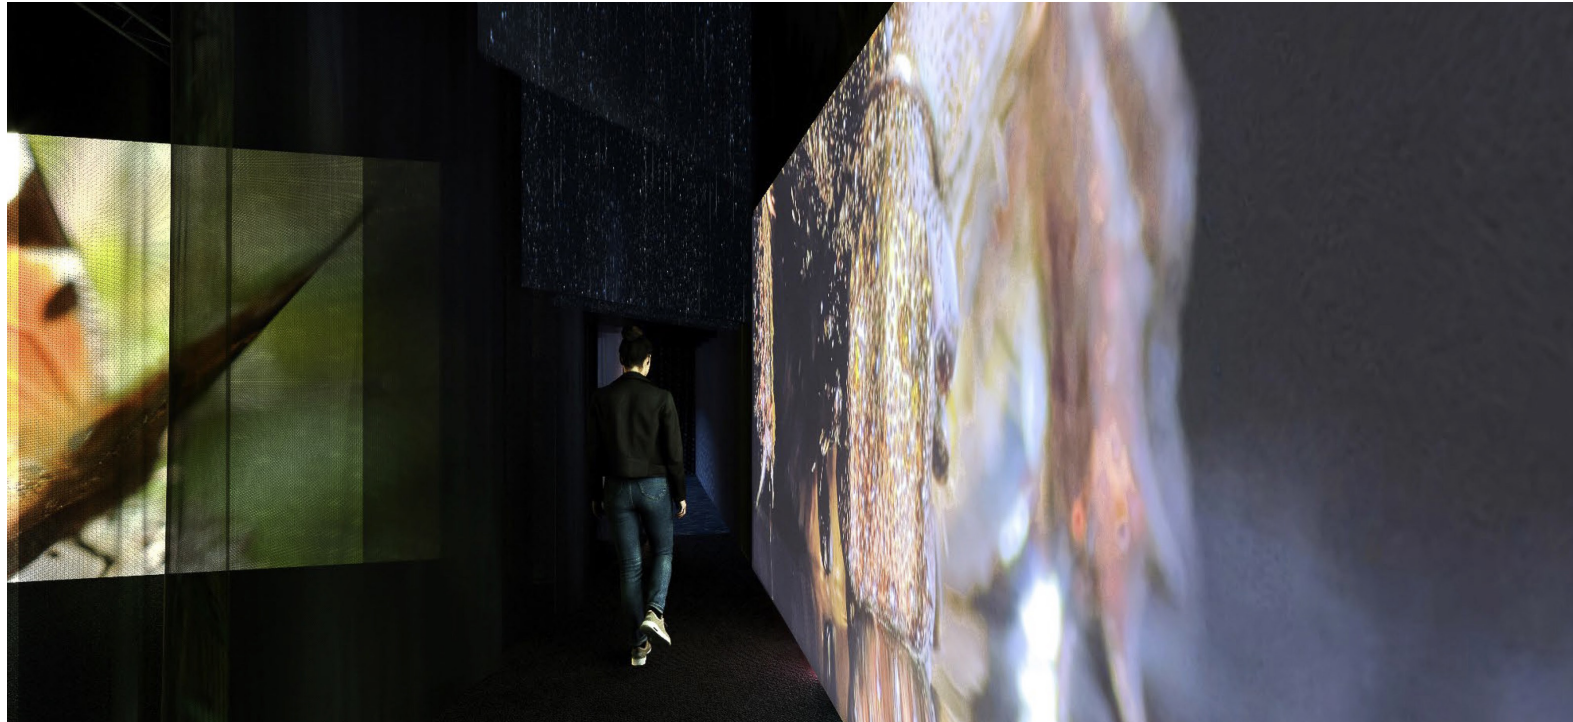

The walk ends with an interpretation space, where visitors can identify the main environments and species that they have encountered. By means of interactive devices, large illustrations and the presentation of natural specimens, they are invited to reflect on their place as human beings in the living world.

STATE-OF-THE-ART TECHNOLOGIES

TECHNICAL SPECIFICATIONS

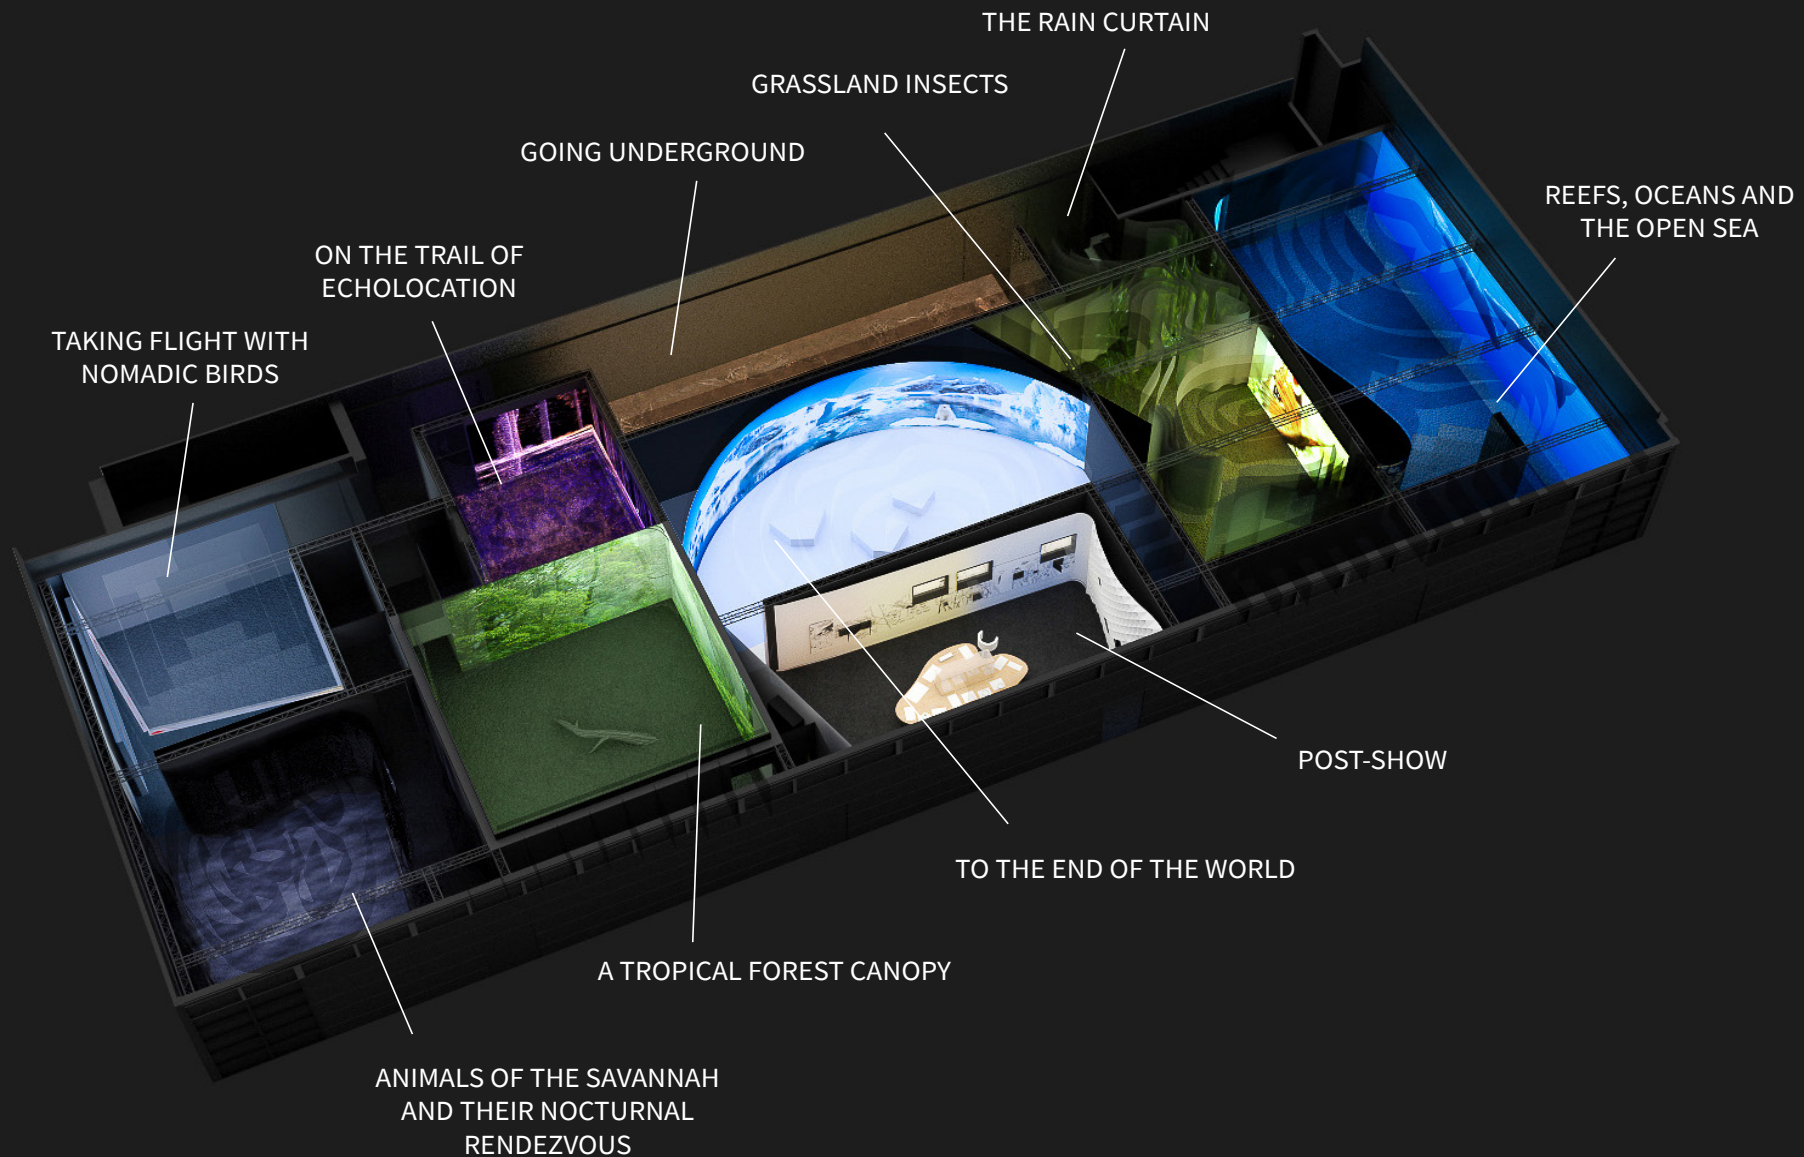

Filmed in 8K resolution at different locations around the planet, Sensory Odyssey's images are imbued with exacting realism. A precisely regulated system of olfactory diffusion, paired with a 360° spatialized sound design, create a totally immersive experience. A high-performance tracking system allows the content to react with great accuracy to visitors' presence and movements.

HOW TO HOST SENSORY ODYSSEY? A TAILORED DEVICE & A CUSTOMIZED ADAPTATION

A TAILORED DEVICE & A CUSTOMIZED ADAPTATION

According to your needs, the package includes:

- Transfer of the rights of use of the multimedia concept for a chosen period of time
- Supply of audiovisual, olfactory and digital content
- Scenographic plans tailored to your location
- Assembly and disassembly
- Specific equipment required to implement the project (video projectors, olfactory management system, stage structure, projection screens, etc.)
- Maintenance system and training of agents on site
- Communication tools
- Transfer of rights to use the museographic and scenographic concept for the presentation of the «back from exploring» space.
